

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Niger. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in Danish. What educational path would you recommend for me?

That's great that you've completed primary school—congratulations! 🎉 You're at an exciting turning point, and since you're fluent in Danish and have a multicultural background, you have strong assets to build on. In Denmark, after primary school (folkeskole), there are several educational paths you can consider depending on your interests, skills, and future goals. Here's a breakdown of your main options:

🎓 1. Gymnasiale uddannelser (General Upper Secondary Education)

These are academic programs that prepare you for university.

✅ Good if you:

- Enjoy theoretical subjects (like languages, science, or humanities)
- Think you might want to attend university later
- Like studying and doing homework

Options include:

- **STX** (Almen studentereksamen): Broad focus – languages, science, humanities.
- **HHX** (Højere handelseksamen): Business and economics focus.
- **HTX** (Højere teknisk eksamen): Technology and science focus.
- **HF** (Højere forberedelseseksamen): 2-year program, more flexible and often for students who didn't go the traditional route.

Recommended if you like schoolwork and want many options later.

🔧 2. Erhvervsuddannelser (Vocational Education and Training – EUD)

These combine school and paid apprenticeship work, so you earn money while learning a trade.

✅ Good if you:

- Prefer hands-on learning

- Want to start working sooner
- Like practical skills and real-life experience

Examples of fields:

- Mechanics, carpentry, plumbing
- Hairdressing, cooking, healthcare
- IT support, retail, business admin

There's also **EUX**, which combines vocational training with academic classes, so you can still go to university afterward.

Recommended if you're practical-minded or want to work sooner.

3. 10. klasse (Optional 10th year)

If you're unsure what to choose yet, you can do an extra year in 10. klasse.

Good if you:

- Want more time to decide
- Need to improve grades or explore options
- Want to mature a bit before choosing

You can do it at a regular school or go to an **efterskole**, which is a boarding school where you also grow personally and socially.

Some personal guidance:

You said you're fluent in Danish and have roots in Niger. That's a strength! You might:

- Be great in roles where cultural understanding is important (e.g., social work, teaching, healthcare)
- Do well in international business or diplomacy (maybe via HHX or STX)
- Bring value in tech or engineering (via HTX or EUX)

If you don't yet know what you enjoy most, think about:

- What school subjects you liked most
 - Whether you prefer theory or practical learning
 - Whether you want to work soon or study longer
-

Next Steps:

1. **Talk to your school counselor** – They can help you explore options.

2. **Visit educational fairs (uddannelsesmesser) or "brobygning" programs** to try out different paths.
 3. **Visit schools' open house days (Åbent Hus)** – see what feels right.
-

Would you like help figuring out which program might fit your interests or strengths more specifically? I can ask you a few questions to narrow it down.
