

Uddannelsesvalg efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Russian Federation. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that! Since you're 16 and just finished primary school in Denmark (folkeskolen), you're at a key decision point. In Denmark, after primary school, there are several main paths you can consider depending on your interests, strengths, and goals.

Here's a breakdown of your main options and some personal guidance based on what you've shared:

🎓 1. Gymnasiale Uddannelser (Upper Secondary Education)

These prepare you for university later. Great if you like academic subjects.

Main types:

- **STX (Studentereksamen)** – Broad and general academic subjects (humanities, sciences, etc.).
- **HHX (Handelshøjskoleeksamen)** – Focus on business, economics, and languages.
- **HTX (Teknisk eksamen)** – Focus on science, technology, and innovation.
- **HF (Højere Forberedelseksamen)** – A 2-year alternative, more flexible and for those who want a quicker route to university or higher vocational education.

Recommended if:

You're interested in going to university later, enjoy studying, or want to keep your options open.

🔧 2. Erhvervsuddannelser (Vocational Education and Training, EUD)

This path mixes school and internships (praktik) and leads directly to a profession.

Examples:

- Electrician, mechanic, chef, hairdresser, carpenter, IT support, social and health worker.

Recommended if:

You prefer hands-on learning, want to start working earlier, or already have a clear career in mind.

⚙️ 3. EUX (Vocational + Academic Hybrid)

This combines vocational training **with** academic courses, giving you both a trade **and** the option to go to university later.

Recommended if:

You want the security of a trade but don't want to close the door to university.

4. International or Alternative Programs

Since you have a Russian background and are fluent in Danish, you might also consider:

- **IB (International Baccalaureate)** – English-based, internationally recognized.
- **Private or specialized schools** – Such as schools with a tech, art, or language focus.

Recommended if:

You're interested in international studies, languages, or maybe studying abroad in the future.

Some personal advice for you:

- **If you're not sure what to do:** Go for a **general gymnasium (STX)** or possibly **HF**, to keep your options open.
 - **If you enjoy business or want to start your own thing:** **HHX** could be a smart move.
 - **If you're hands-on and want to learn by doing:** Consider **EUD** or **EUX** in a field you find interesting.
 - **If you're ambitious and want international flexibility:** The **IB** might be worth looking into.
-

Final thoughts:

At 16, you don't need to have your whole life figured out. Try to choose a path that fits what you enjoy doing **now**, but that also keeps a few doors open for your future.

If you'd like, I can help you narrow it down further by asking:

- What are your favorite subjects?
- Do you prefer theoretical or practical learning?
- Are you thinking about going to university later?
- Do you already have a career or dream job in mind?

Let me know, and I'll help tailor a plan for you.
