

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Rwanda. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in Danish. What educational path would you recommend for me?

That's a big and exciting decision, and it's great that you're thinking carefully about your future. In Denmark, finishing **primary school (folkeskole)** typically means you're around the point of choosing between several secondary education options. Here's a breakdown of the main educational paths you can take after primary school, along with some advice tailored to your situation:

Main Educational Paths After Primary School in Denmark

1. Gymnasiale uddannelser (Upper Secondary Education – Academic Path)

These are designed to prepare you for university.

Options:

- **STX (Studentereksamen)** – General academic focus (humanities, sciences, languages).
- **HHX (Higher Commercial Examination)** – Focus on business, economics, marketing.
- **HTX (Higher Technical Examination)** – Focus on technology, science, and innovation.
- **HF (Higher Preparatory Examination)** – Shorter (2 years), good for more mature students or if you're unsure.

 **Recommended if:** You enjoy academic subjects and might want to go to university later.

2. Erhvervsuddannelser (VET – Vocational Education and Training)

These combine school with apprenticeship training and lead directly to a job.

Examples:

- Electrician
- Carpenter
- Hairdresser
- Chef
- Health care assistant

 **Recommended if:** You like hands-on learning, want a shorter route to a job, and are interested in trades or practical careers.

Things to Consider in Your Decision

✓ 1. What are your interests?

- Do you like working with your hands? → Consider a **vocational education**.
- Are you curious about the world, society, science, or business? → Consider **STX, HHX, or HTX**.

✓ 2. Do you want to go to university someday?

- Then one of the **gymnasiale** educations is the right path.
- If you're unsure, **STX or HF** can keep your options open.

✓ 3. Do you prefer practical or theoretical learning?

- **Vocational paths** are more practical and career-oriented.
- **STX, HHX, HTX** are more theory-based.

My Advice for You

Since you're fluent in Danish, born and raised in Denmark, and finished folkeskole, you're well-placed to succeed in the Danish system. Here's a potential path based on a balanced view:

If you're unsure but open to university in the future:

→ Go for **STX** (most flexible, broad education) or **HHX** (if you're interested in business, economics, entrepreneurship).

If you're more practical and want to work sooner:

→ Explore a **vocational education (EUD)** in something that interests you. You can still access further education later if you want.

Next Steps

1. **Talk to a UU-vejleder** (youth guidance counselor) – They're free and trained to help you choose.
2. **Visit schools** – Many offer open houses or orientation days.
3. **Ask your teachers or parents** for advice – they know your strengths.
4. **Try internships or "brobygning"** (bridge-building programs) – to test different fields before choosing.

If you tell me more about what you enjoy (subjects, hobbies, dreams), I can give more personalized advice!
