

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Slovakia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing a bit about your background! Since you just finished primary school in Denmark, you're at a great point to explore your interests and strengths. The Danish education system offers several solid paths after primary school (folkeskolen), and your choice depends on a mix of:

- **Your interests and strengths (academic, practical, or creative)**
- **Career goals (or what you might enjoy doing later)**
- **Whether you want to continue studying at university or start working earlier**

Here are the main options for you in Denmark after 9th or 10th grade:

1. Gymnasiale Uddannelser (Upper Secondary Education)

If you enjoy academic subjects and might want to go to university later.

Main options:

- **STX (Studentereksamen):** General upper secondary – broad subjects like Danish, math, history, science, etc.
- **HTX (Teknisk Gymnasium):** Focus on science and technology – good if you're into IT, engineering, or science.
- **HHX (Handelsgymnasium):** Focus on business, economics, and international trade.
- **HF (Højere Forberedelseseksamen):** 2-year option – more direct, less broad, often for more mature students or those who want to work sooner.

Good for: University or other higher education later.

2. Erhvervsuddannelser (Vocational Education – EUD/EGU/EUX)

If you're more hands-on, want to learn a profession, and maybe start working earlier.

Options:

- **EUD:** Learn a trade (like carpenter, chef, hairdresser, mechanic) – combines school and apprenticeship.
- **EUX:** Combines vocational training with upper secondary academics – keeps the door open to university.
- **EGU:** More flexible for those who need a tailored, practical approach.

Good for: Starting a job quickly or getting practical skills. You can always study more later, especially with EUX.

3. International Options or Exchange

You could also consider:

- International high school (IB – International Baccalaureate)
- A year abroad (e.g., efterskole or youth exchange)
- Programs that combine education with travel or language learning

These can be especially interesting if you're interested in using both your Danish and Slovak background or learning new languages.

What You Should Consider

Ask yourself:

- Do I like studying in a classroom, or do I prefer hands-on learning?
 - Do I see myself going to university?
 - What subjects do I enjoy most (math, science, art, business, etc.)?
 - Do I want to start working early or continue studying?
-

Examples

- If you're good at science/math and curious about tech: **HTX** or **EUX (IT or tech direction)**
 - If you like business and social studies: **HHX**
 - If you're more practical or creative: **EUD (with a trade)** or even **creative efterskole** for a year
-

If you want, you can tell me:

- What subjects you like or dislike
- What kind of career or job sounds interesting to you (even just a guess!)
- Whether you prefer school learning or doing things in real life

I can help you narrow it down even more.
