

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from South Africa. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's a great place to start – congrats on finishing primary school! In Denmark, after primary school (**folkeskole**), you generally have a few main educational paths to choose from depending on your interests, academic strengths, and long-term goals.

Here's a breakdown of your main options:

1. Gymnasiale uddannelser (Upper Secondary Education)

These are academic high schools that prepare you for university.

- **STX (Almen Studentereksamen)** – The most common and broad. Good if you're unsure and want to keep many doors open.
- **HHX (Højere Handelseksamen)** – Focuses on business, economics, and languages.
- **HTX (Højere Teknisk Eksamen)** – Focuses on science, technology, and innovation.
- **HF (Højere Forberedelseksamen)** – A 2-year program that's more practical and flexible, often used by students who want to apply later to higher education.

Good if:

- You like schoolwork and want to go to university.
- You're unsure exactly what you want to do, but want options.

2. Erhvervsuddannelser (Vocational Education and Training – EUD)

These combine school and practical training with a company.

- You'll learn a trade like electrician, carpenter, hairdresser, chef, social worker, IT support, etc.
- You get a student salary (løn) during your apprenticeship.

Good if:

- You want hands-on work.
- You want to earn money while learning.
- You want a clear path into the workforce.

3. Kombineret forløb – EUX

This mixes vocational training (EUD) **with** a general upper secondary education. You can both work **and** go to university afterward.

Good if:

- You want the best of both worlds: job skills and academic qualification.
 - You're motivated and hardworking – it's demanding!
-

 A Few More Thoughts for You

- Since you're bilingual (Danish + likely English and maybe other South African languages), you could consider international careers, translation, global business, or diplomacy.
 - If you're interested in your South African heritage, you might look at programs that connect with global studies, development, or African studies later on.
-

 Recommendation Strategy

If you're **not sure what you want to do yet**, I'd recommend:

- **STX** or **EUX**: they give you the most flexibility.
 - Try talking to a **UU-vejleder (Youth Guidance Counselor)** — they can give personal advice and help set up internships or visits to different schools.
-

Would you like help narrowing this down based on your interests (like tech, health, arts, business, etc.)? That would help me tailor my recommendation even more.
