

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from South Sudan. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background — it's great that you're thinking ahead about your education. In Denmark, after finishing **primary school (folkeskole)**, you have several good options, and the best path depends on your interests, skills, and long-term goals. Here's an overview of your main choices, followed by some recommendations:

Main Educational Paths in Denmark After Primary School:

1. Gymnasiale uddannelser (General Upper Secondary Education) – 3 years

- **STX** (Studentereksamen): General and academic. Good if you want to go to university later.
- **HHX** (Higher Commercial Examination): Business and economics focus.
- **HTX** (Higher Technical Examination): Science and technology focus.
- **HF** (Higher Preparatory Examination): 2-year option, more flexible.

2. Erhvervsuddannelse (Vocational Education and Training – VET) – 1.5 to 5 years

- Practical, hands-on training with a mix of school and apprenticeship.
- Leads to work or further education (like erhvervsakademi or professionsbachelor).
- Examples: Electrician, carpenter, hairdresser, social worker assistant, IT technician.

3. Kombinerede forløb (EUX)

- Mix of vocational training and academic education.
- You get a studentereksamen (like STX) **and** a trade qualification.
- Good if you want flexibility — both job-ready and eligible for university.

Personalized Recommendation Based on You:

You're 16, born and raised in Denmark, fluent in Danish, and just finished folkeskole. Since you likely have a good grasp of the Danish system and culture, you can really choose any of the paths. But here's how to narrow it down:

IF YOU WANT TO GO TO UNIVERSITY LATER:

- **STX**: Best general path, opens most doors.
- **HTX**: Go here if you love science, math, or technology.

- **HHX**: Choose this if you're interested in business, economics, or entrepreneurship.
- **HF**: More flexible, but a bit shorter. Great if you want to get to university quicker or need a more mature learning environment.

✔ **IF YOU PREFER PRACTICAL WORK OR EARNING MONEY EARLIER:**

- **EUD (Vocational)**: Great for direct job entry — especially trades, healthcare, hospitality, or IT.
- **EUX**: Perfect if you want job training **and** the option to go to university later. Demanding, but very useful.

💡 **Questions to Ask Yourself:**

- Do I enjoy studying and school, or would I rather work with my hands?
- Do I want to go to university someday?
- Do I have a specific career dream (e.g., engineer, nurse, entrepreneur)?
- How soon do I want to earn my own money?

📌 **Final Thoughts & Suggestion:**

If you're unsure but want to keep doors open, **EUX** is a smart choice. It gives you both academic and vocational qualifications. Otherwise, **STX** or **HTX** is great if you enjoy learning and want the possibility to go to university.

Would you like help exploring schools near you or specific interests like business, science, or healthcare? I can guide you more specifically if I know what subjects you enjoy or what jobs you think are cool.
