

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Sweden. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in Danish. What educational path would you recommend for me?

Thanks for sharing that! Being 16 and finishing primary school in Denmark puts you in a great position to start shaping your future. Since you're fluent in Danish and have a Swedish background, you actually have some unique opportunities both in Denmark and potentially in Sweden later on. Here's a breakdown of your main educational options in Denmark after primary school (folkeskole), and some thoughts on what to consider:

🎓 Main Educational Paths After 9th/10th Grade in Denmark:

1. Gymnasiale uddannelser (Upper Secondary Education – for university track)

These are academically focused and prepare you for higher education (university, professionshøjskole, etc.):

- **STX (Alment gymnasium):** Broad and academic. Good if you're interested in humanities, natural sciences, or social sciences.
- **HHX (Handelsskole):** Business and economics focused. Great if you're thinking about working in finance, business, or starting your own company.
- **HTX (Teknisk gymnasium):** Focuses on technology and natural sciences. Ideal for future engineers, IT specialists, or technical university programs.
- **HF (Højere Forberedelseksamen):** Shorter (2 years), more practical and flexible. Good if you're not fully sure yet, or if you want a faster route to further education.

👉 Choose one of these if you want to go to university or you're unsure and want to keep doors open.

2. Erhvervsuddannelser (Vocational Education and Training – EUD)

This is a mix of school and apprenticeships, leading to skilled trades (e.g. electrician, carpenter, chef, hairdresser, etc.).

- You earn while you learn.
- Good job prospects directly after the program.
- Can also lead to further education (e.g., erhvervsakademi or professionshøjskole).

👉 Choose this if you prefer hands-on work or already have a specific job interest.

3. Kombinerede forløb (EUX)

Combines vocational training with academic studies — you get both a trade qualification **and** a gymnasial level certificate.

👉 *Good if you want a practical job but also want to keep the option of university open.*

How to Decide?

Ask yourself:

- Do I enjoy studying (theory, books, exams)? → Consider STX, HHX, HTX, or HF.
 - Do I like working with my hands or being active? → Consider EUD or EUX.
 - Am I interested in a specific career already (e.g., doctor, engineer, chef, entrepreneur)?
 - Do I want to go to university later? → Pick a gymnasial path or EUX.
 - Do I want to enter the workforce sooner? → Pick EUD or EUX.
-

Bonus: Your Swedish Background

Since your parents are Swedish:

- You might consider international or bilingual programs in the future.
 - You can also look at the **Nordic agreement**, which makes it easy for Danish students to study in Sweden and vice versa.
-

Recommendation Summary

If you're unsure and want to keep most doors open:

- **STX** (broadest academically) or **EUX** (practical + academic combo) are excellent choices.

If you already have a strong interest (e.g. tech, business, trades), pick a path that matches:

- **HTX** for technology
 - **HHX** for business
 - **EUD** for trades
-

If you'd like, I can help you decide based on your interests (e.g. favorite subjects, hobbies, career dreams). Want to tell me more about that?
