

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Thailand. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background — it's great that you're thinking seriously about your next step. Since you've just finished primary school in Denmark and are 16, you're likely at the point of choosing between the main educational paths in the Danish system after **Folkeskole**. Here's a clear breakdown of your options and what might suit you depending on your interests and goals:

🎓 1. Gymnasiale Uddannelser (Upper Secondary Education)

These prepare you for higher education (university or similar) and last about 3 years.

👉 STX – Studentereksamen

- Broad academic program (focuses on humanities, social sciences, and natural sciences).
- Good if you're unsure what to study later or want to keep your options open.

👉 HTX – Teknisk Studentereksamen

- Focuses on technology, science, and innovation.
- Great if you like science, IT, or engineering.

👉 HHX – Højere Handelseksamen

- Focus on business, economics, and international trade.
- Ideal if you're interested in finance, marketing, or running your own business.

👉 HF – Højere Forberedelseksamen

- Shorter (2 years), more focused academic program.
- Often used as a second chance path or for people who prefer more mature learning environments.

🔧 2. Erhvervsuddannelse (Vocational Education and Training, EUD)

If you're more hands-on or want to get into a profession quickly (with or without further study later), this could be a good fit.

- You learn both in school and as an apprentice at a workplace.
- Programs include fields like: electrician, chef, mechanic, health worker, hairdresser, etc.

- You can even go to university later via **EUX** (see below).

👉 **EUX – Combination of EUD + Gymnasium**

- You get a vocational education **plus** a higher education entrance qualification.
 - Demanding but gives you both practical skills and academic qualifications.
-

🌐 **Things to Consider When Choosing**

- **Your interests** – Are you more academic, creative, technical, or practical?
 - **Future goals** – Do you want to go to university, start working soon, or start a business?
 - **Grades** – Some programs may have minimum grade requirements.
 - **Language & culture** – Your bilingual background can be a big advantage, especially in HHX or international settings.
-

✨ **Personal Suggestion Based on Your Background**

If you're fluent in Danish and possibly also Thai or English, and you're open to working internationally or in multicultural settings, then:

- **HHX** could be a great choice: It builds business knowledge, includes economics and international trade, and prepares you for a wide range of studies and jobs.
 - If you're more into tech, **HTX** is also an excellent path with strong job prospects and lots of innovation.
-

Would you like help picking a specific school or need info on what each program looks like day-to-day? I can help you explore that too.
