

Uddannelsesvalg efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Uganda. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background — you're in an important transition stage, and it's great that you're thinking ahead. In Denmark, finishing primary school (folkeskole) usually means you're around 15-16, so you're likely now deciding between the main post-primary educational paths. Here's a breakdown of your options and some guidance based on your age, situation, and goals:

Main Education Paths After Primary School in Denmark

1. Gymnasiale Uddannelser (General Upper Secondary Education – 3 years)

These are academic tracks that prepare you for university.

- **STX (Almen Studentereksamen)** – General high school, with a mix of sciences, humanities, and languages.
- **HHX (Højere Handelseksamen)** – Focus on business, economics, and marketing.
- **HTX (Højere Teknisk Eksamen)** – Focus on technology, science, and innovation.
- **HF (Højere Forberedelseksamen)** – A 2-year program for those who may not want 3 years or need a more flexible/alternative path.

 Recommended if:

- You like academic learning.
- You might want to go to university later.
- You're unsure but want to keep your options open.

2. Erhvervsuddannelser (Vocational Education and Training – VET)

These are practical programs that combine school and apprenticeship.

- You train to become a skilled worker: electrician, hairdresser, carpenter, healthcare assistant, etc.
- Usually takes 3-5 years, depending on the field and your pace.
- You can also get an **EUX**: a combo of VET and academic education, so you can still go to university later.

 Recommended if:

- You enjoy hands-on work.
- You want to start working earlier.
- You're interested in a specific trade or profession.

3. 10th Grade (10. klasse)

- Optional year between folkeskole and further education.
- Good if you're unsure or need time to improve grades.
- You can do 10th grade at a **regular school**, a **production school (Produktionsskole)**, or an **efterskole** (residential school, often with a theme or focus).

✅ Recommended if:

- You're not sure what to choose.
- You want more time to grow personally or academically.

How to Decide?

Here are some questions to help you choose:

- Do you enjoy school subjects like math, languages, science? → Consider **STX**, **HTX**, or **HHX**.
- Are you more practical, like working with your hands or being active? → Look at **VET** or **EUX**.
- Do you like helping people or see yourself in healthcare? → Look at **SOSU-uddannelser** (Social and health care).
- Do you need more time or want to explore different interests? → Take **10th grade**, maybe at an **efterskole**.

A Note on Background and Representation

Being Danish with Ugandan roots is a strength — Denmark needs more diverse representation in all areas: healthcare, business, tech, politics, education, and more. Think about fields where your voice and perspective could make a difference.

Final Suggestions

- **If you're unsure:** Take 10th grade, ideally somewhere that lets you explore your interests (like an efterskole).
- **If you're academic and curious:** Consider STX or HHX, especially if you want university as an option.
- **If you like being hands-on or want to work earlier:** Look at a VET path or EUX.

You can also talk to a **UU-vejleder (Ungdommens Uddannelsesvejledning)** – every municipality in Denmark has one. They can guide you personally.

If you tell me what subjects you enjoy or your future dreams (even vague ones!), I can help you narrow it down even more.
