

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from United Arab Emirates. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background — that helps a lot in tailoring good advice. Since you just finished primary school in Denmark, you're at an important transition point. In Denmark, after **folkeskole (primary/lower secondary school)**, you typically choose between several types of **youth education programs** depending on your interests, academic strengths, and career goals.

Here are the **main options**, with recommendations based on different interests:

🎓 1. Gymnasiale Uddannelser (Upper Secondary Education)

These are more academic and prepare you for higher education (like university):

- **STX (Studentereksamen)** – Broad and general; strong in humanities, sciences, and social sciences.
- **HHX (Higher Commercial Exam)** – Focus on business, economics, and marketing.
- **HTX (Higher Technical Exam)** – Focus on technology, IT, science, and math.
- **HF (Higher Prep Exam)** – Shorter (2 years), for students who prefer a more practical and less demanding academic program.

Recommended if:

You enjoy studying and want the option to go to university later. Since you're fluent in Danish and presumably good at school (having just completed folkeskole), this is a solid path.

If you like business or economics and want to keep future options open — **HHX** might suit you well.

🔧 2. Erhvervsuddannelser (Vocational Education and Training - EUD)

These are practical and prepare you directly for a trade or profession, e.g.:

- Electrician
- Carpenter
- Hairdresser
- Mechanic
- Health care assistant
- IT support

You can also choose **EUX**, which combines vocational training with academic subjects — so you can still go to university if you want later.

Recommended if:

You like hands-on work, want to earn money earlier, and maybe aren't as excited about academic studies. **EUX** is great if you want both a trade and the option to study further.

Bonus considerations for you:

- Being fluent in both Danish and (potentially) Arabic/English is a huge plus — could help in **international business, tourism, translation, diplomacy**, or **IT**.
 - If you're interested in helping communities or cross-cultural work, you could look into **social sciences, teaching**, or **healthcare** later.
 - Denmark has a strong support system for students — free education and even SU (student grants) when you're older.
-

What to think about:

Ask yourself:

- Do I want to go to university one day?
 - Do I prefer academic work or practical work?
 - What subjects do I enjoy most?
 - Do I want to start working soon or keep studying?
-

Final thoughts:

If you're not sure yet, **STX** or **HHX** are safe choices — they keep many doors open. You can always switch paths later if needed. Talk to your school counselor (UU-vejleder) — they can help based on your grades, personality, and goals.

Would you like help comparing STX, HHX, and HTX in more detail?
