

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Uruguay. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's a great place to be — finishing primary school is a big step, and it's smart that you're already thinking about what comes next. Since you're in Denmark and just finished **folkeskolen**, you have a few clear paths available depending on your interests, strengths, and future goals.

First, here are your main options in Denmark after primary school (9th or 10th grade):

1. Gymnasiale uddannelser (Upper Secondary Education / High School Equivalent)

These are academic and prepare you for university.

- **STX (Studentereksamen)** – General upper secondary school. Broad focus: humanities, natural sciences, social sciences.
- **HHX (Higher Commercial Examination)** – Focus on business, economics, international trade.
- **HTX (Higher Technical Examination)** – Focus on technology, science, engineering.
- **HF (Higher Preparatory Examination)** – A bit shorter (2 years), good if you're looking for a more practical and direct way to higher education.

Choose this path if:

You enjoy school subjects, want to go to university, or aren't yet sure what career you want but want to keep your options open.

2. Erhvervsuddannelser (Vocational Education and Training – EUD)

These prepare you for specific careers and combine school with internships.

- Examples: electrician, carpenter, chef, mechanic, childcare assistant, healthcare assistant, IT support.
- Usually 2-5 years depending on the trade.
- You can still go to university after (through **EUX**), or enter the workforce directly.

Choose this path if:

You prefer hands-on learning, want to get a job sooner, or have a clear career in mind that doesn't require university.

3. 10. klasse

An optional extra year if you're not sure yet, want to improve your grades, or just need more time to decide.

✓ Choose this path if:

You're unsure or need more academic preparation before starting STX, HHX, HTX, or EUD.

🇩🇰 Special to your situation:

- Being **bilingual and bicultural** (Danish and Uruguayan/Spanish-speaking) is a **huge asset**, especially in international business, diplomacy, translation, education, and tourism.
- If you have any **interest in Latin America, international work, or languages**, paths like **HHX, STX**, or even **language-focused HF** might open interesting doors.

✨ Recommendations Based on Interests:

If you like...	Consider...
Science, health, or tech	HTX
Business, economics, travel	HHX
Literature, history, languages	STX
Helping people, practical work	EUD (e.g., healthcare, childcare)
You're unsure and need time	10. klasse or STX

Next Steps

1. **Talk to a vejleder (guidance counselor)** at your school or through **e-vejledning.dk**.
2. **Visit open houses** at local gymnasiums and vocational schools.
3. Consider where your **interests, skills, and energy** line up — don't just choose what friends are doing.
4. Think long-term, but know that **you can always change paths later**.

If you'd like, I can help you create a small decision tool or ask a few questions to figure out which path fits you best. Would that help?
