

Uddannelsesvalg i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Vanuatu. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing a bit about yourself! Since you've just finished primary school in Denmark and are now considering your next steps, that puts you right at the stage where Danish students typically choose between different secondary education paths. Here's a breakdown of your main options — and some guidance to help you decide based on your interests, strengths, and goals.

Main Educational Paths After Primary School in Denmark

1. Gymnasiale uddannelser (Upper Secondary Education) – Academic Focus

These are 3-year programs that prepare you for university.

- **STX (Studentereksamen):** Broad general education (humanities, science, social science).
- **HHX (Højere Handelseksamen):** Focus on business, economics, and languages.
- **HTX (Højere Teknisk Eksamen):** Focus on technology, science, and innovation.
- **HF (Højere Forberedelseksamen):** 2-year general program – often used if you want to enter specific short or medium-length professional programs later.

Good for you if:

- You're academically strong and might want to go to university.
- You enjoy subjects like science, literature, languages, or social studies.

2. Erhvervsuddannelser (Vocational Education and Training - EUD) – Practical Focus

These are for students who want to start working sooner in skilled professions (like electrician, chef, carpenter, healthcare worker, etc.).

Good for you if:

- You enjoy hands-on learning and working with people, tools, or machines.
- You want to enter the workforce faster but still have the option to continue education later.

3. Kombinationsforløb (EUX) – A Mix of Vocational + Academic

A great middle-ground: you train for a job **and** get qualifications to go to university later.

Good for you if:

- You want job skills *and* want to keep doors open for higher education.

How to Decide

Ask yourself:

1. **Do I enjoy studying academic subjects, or prefer learning by doing?**
2. **Do I already have an idea of what job or career I want?**
3. **Do I want to go to university one day, or start working earlier?**
4. **What subjects do I enjoy most?**

Your Background – A Strength!

Coming from a Vanuatuan background while being fluent in Danish gives you a strong multicultural identity. This can be a real asset, especially in fields like:

- International business (HHX could be a good fit).
- Social work or healthcare (EUD or HF).
- Technology or science (HTX).
- Languages and cultural studies (STX).

✨ Final Thoughts + Suggestions

Here are three example paths you could consider:

Option A: STX

If you're curious about a broad range of subjects and possibly going to university – like becoming a teacher, psychologist, or engineer.

Option B: EUX Business or Technology

If you want both job skills and the chance to study later. A great way to keep your options open.

Option C: EUD (Vocational Track)

If you already know you want to become something practical, like a mechanic, hairdresser, IT support tech, etc.

Would you like help finding schools near you that offer specific programs? Or do you want to explore your interests more deeply to help you decide?
