

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Mexico. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

It's great that you're thinking carefully about your next steps — and it's exciting that you have both Danish and Mexican cultural backgrounds to draw from! Since you've just finished primary school in Denmark, you're now at the point where most young people choose between different secondary education paths. Let's break down your options, so you can consider what fits you best.

Main educational options after primary school (Folkeskole) in Denmark

Gymnasiale uddannelser (General upper secondary education)

These are academic tracks that prepare you for higher education (university, etc). They typically last 3 years. The main types are:

- **STX (Studentereksamen)** – Broad, academic focus with many subject choices (humanities, science, social studies).
- **HHX (Higher Commercial Examination)** – Focus on business, economics, international trade.
- **HTX (Higher Technical Examination)** – Focus on technology, natural sciences, innovation.
- **HF (Higher Preparatory Examination)** – Shorter (2 years), more flexible, for those who prefer practical + academic mix.

 **Recommended if:** You enjoy studying a range of subjects and think you want to go to university or higher education.

Erhvervsuddannelser (Vocational education and training / VET)

These combine school and apprenticeship (praktik) in a company. You train for a specific trade or job, e.g. carpenter, electrician, chef, healthcare assistant.

 **Recommended if:** You like hands-on, practical work and want to start earning earlier while training for a career.

Kombinerede forløb / Eux

A mix of vocational education and general upper secondary education. You can qualify both for a trade and for university.

 **Recommended if:** You want practical training + keep the door open for higher education.

What should guide your choice?

- ✓ **Your interests:** Do you enjoy academic subjects (math, languages, science)? Or do you prefer working with your hands, creating, or practical tasks?
 - ✓ **Your strengths:** Are you good at studying theory, or do you thrive when you see direct results of your work?
 - ✓ **Future plans:** Do you dream of university, or would you prefer to start working sooner?
 - ✓ **Cultural perspective:** Your Mexican heritage could be an advantage — perhaps you'd like to study international trade, languages, or something that connects Denmark and Mexico?
-

My suggestion based on what you shared

Since you're fluent in Danish and grew up in Denmark with Mexican roots, I think you could benefit from considering **STX** or **HHX**, especially if you're interested in keeping your options open for university or international opportunities.

- **STX:** Good if you want a broad education with lots of subjects (maybe explore languages, culture, or science).
- **HHX:** Good if you're curious about business, trade, and might want to work internationally — maybe with ties to Mexico too!

If you already feel more drawn to working with your hands or creating things (e.g. design, IT, crafts), then **HTX** or a **VET / Eux** track could be exciting.

What's next?

If you want, I can help you:

- Make a comparison table of the options
- Find schools in your region
- Reflect on your strengths and interests
- Explore how your Mexican background could shape your path (e.g. language studies, international business)

Do you have a specific area you're already interested in (like science, business, art, technology)? Or would you like help figuring that out?
