

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Afghanistan. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing a bit about yourself — it's great that you're thinking carefully about your next steps! In Denmark, after finishing primary school (folkeskole), you have several good educational options, and the best path depends on your interests, strengths, and future goals. Let me outline the main possibilities and offer guidance:

☀ Main educational paths after primary school

1 Gymnasiale uddannelser (General upper secondary education)

These programs prepare you for higher education (university or other advanced studies). They usually last 3 years. Examples:

- **STX (Studentereksamen)** — broad academic focus (humanities, sciences, social sciences)
- **HHX (Higher Commercial Examination)** — focus on business, economics, marketing
- **HTX (Higher Technical Examination)** — focus on technology, science, engineering
- **HF (Higher Preparatory Examination)** — shorter (2 years), often for those who want flexibility or didn't take the traditional route

✓ Good if:

- You enjoy academic subjects
- You want to keep your options open for university or other higher education

2 Erhvervsuddannelser (Vocational education and training, VET)

These combine school and apprenticeship, leading to skilled trades and professions. Examples:

- Electrician, carpenter, chef, healthcare assistant, IT-supporter, etc.

✓ Good if:

- You want to work in a practical job after a few years
- You like learning by doing
- You want to start earning money earlier

3 Kombinationsuddannelser (Combination programs)

- **EUX** — a mix of vocational training and general upper secondary education. You get both a trade qualification and eligibility for university.

✓ Good if:

- You want a skilled trade **and** the option for higher education later

Things to consider

- What subjects do you enjoy most? (math, languages, science, creative arts, hands-on work?)
- Do you prefer practical work or academic learning?
- Are you thinking about university, or would you rather enter the job market sooner?
- What are your long-term dreams? (engineer, doctor, entrepreneur, craftsman, designer, teacher, etc.)

Recommendation

Since you are fluent in Danish and have a strong background in the Danish school system, you can succeed in any of these paths.

👉 **If you enjoy academic subjects and want to keep options open:**

Consider **STX**, **HHX**, or **HTX** depending on your interests:

- STX: if you like a broad mix (humanities, science, social science)
- HHX: if you are interested in business, economy
- HTX: if you like science, technology

👉 **If you prefer hands-on learning and a quicker path to work:**

Consider **EUD** (vocational) or **EUX** (vocational + academic). **EUX** is especially good if you want flexibility.

Next steps

- ✓ Visit open house events (åbent hus) at local gymnasier and erhvervsskoler
- ✓ Talk to a study counselor (studievejleder) at your school or at the schools you're considering
- ✓ Try a "brobygning" or internship to test what fits you

If you'd like, tell me:

- 👉 What subjects do you like most?
- 👉 Do you have any dream job in mind?
- 👉 Do you want to go to university, or are you more interested in working sooner?

I can help narrow it down further based on your answers!
