

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Algeria. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a really thoughtful question—it's great that you're planning ahead! Since you're 16, finished primary/lower secondary school (folkeskolen), and fluent in Danish, you're at an important decision point in the Danish education system. Let's break down your options and things to consider so you can choose a path that fits *you*.

☀ Main education paths after folkeskolen

In Denmark, you usually have these choices:

1 General upper secondary education (Gymnasiale uddannelser)

These prepare you for higher education (universities, academies, etc.).

- **STX (Studentereksamen)** – broad, academic focus (languages, sciences, humanities).
- **HHX (Handelsskolen)** – focus on business, economics, marketing.
- **HTX (Teknisk gymnasium)** – focus on technology, science, IT.
- **HF (Højere forberedelseseksamen)** – 2-year academic program (often for more mature students, or those wanting a shorter path).

2 Vocational education and training (Erhvervsuddannelse / EUD)

If you want to learn a trade and work directly after or combine with further studies (e.g., EUX).

- Examples: carpenter, electrician, healthcare worker, chef, mechanic.
- EUX combines vocational training with a study program that allows you to apply to higher education too.

💡 What to consider when choosing

✓ Interests:

Do you enjoy academic subjects (math, science, languages, humanities)? Or do you like practical, hands-on work (building, designing, creating, helping people)?

✓ Future goals:

Do you think you might want to go to university or college later? Or would you rather start working sooner with good skills?

✓ Learning style:

Do you prefer theoretical learning (reading, writing, research)? Or practical learning (projects, teamwork,

making things)?

✓ Strengths:

What subjects do you feel strongest in? Are you good at communication, problem-solving, technical skills, creativity?

🇩🇰 Example choices for different profiles

👤 If you're interested in **business/economy/entrepreneurship** → HHX

👩 If you like **science, technology, IT** → HTX

📖 If you want a broad academic base → STX

🔧 If you want to **learn a trade and work sooner** → EUD (or EUX if you want both work and study options)

🌍 Your background

Being from a multicultural background can be a strength in many paths. For example:

- In business (HHX) → understanding diverse markets/customers
 - In healthcare/social fields → bringing empathy and cultural understanding
 - In technology → globally in demand
-

💬 My suggestion

Since you're still deciding:

- ➔ Visit open house events ("åbent hus") at local gymnasiums and vocational schools.
- ➔ Talk to a *studievejleder* (student counselor)—they can help match your interests to programs.
- ➔ Try to think where you see yourself in 5-10 years.

If you want, tell me:

- What subjects do you like most/least?
- Do you prefer practical or theoretical learning?
- Do you have a dream job or career idea?

I can then give you a more tailored recommendation! 🚀
