

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Andorra. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing that context! It's great that you're thinking ahead about your future. Since you've just completed primary school in Denmark (which typically means *folkeskole* up to 9th or 10th grade), your next step depends on your interests, strengths, and long-term goals. Let's break it down:

Common educational paths in Denmark after primary school

1 Gymnasium (STX)

- Focus: General academic education (humanities, social sciences, natural sciences).
- Good if you enjoy theoretical subjects and are considering university later.

2 HHX (Higher Commercial Examination Programme)

- Focus: Business, economics, international trade.
- Good if you like business, marketing, or economics.

3 HTX (Higher Technical Examination Programme)

- Focus: Technical and scientific subjects.
- Good if you enjoy technology, science, engineering, IT.

4 HF (Higher Preparatory Examination Programme)

- A shorter, 2-year program, often for older students or those who want a more flexible academic path.

5 EUD (Vocational education and training)

- Focus: Practical skills with apprenticeships.
- Leads to direct work or skilled trades (e.g. carpenter, chef, electrician).

6 EUX (Combination of vocational education + upper secondary exam)

- Combines practical training with a high school diploma—ideal if you want both hands-on skills and the option for university.

Factors to consider

- ✓ **Your interests** — Do you prefer academic studies, hands-on work, or a mix?
 - ✓ **Your strengths** — Are you good at math, languages, science, arts, or practical tasks?
 - ✓ **Your future goals** — Do you think you want to go to university, start working, or maybe start a business?
 - ✓ **Cultural opportunities** — With your Andorran background, maybe international business (HHX) or languages would appeal to you?
-

💡 Example recommendations

- If you like **theory, university in the future, and a broad education** → STX
 - If you like **science, technology, or engineering** → HTX
 - If you like **business, international trade, economics** → HHX
 - If you want **practical training + academic options** → EUX
 - If you want to **get a job in a skilled trade soon** → EUD
-

✨ Next step

👉 I recommend you:

- Visit open house events at local schools (many offer “*infoaften*” or trial days).
 - Talk to a guidance counselor at *Ungdommens Uddannelsesvejledning (UU)* in your area — they can help you map out options.
 - Reflect on what subjects or activities you’ve enjoyed most so far.
-

If you’d like, tell me:

- What subjects do you enjoy the most?
- Do you see yourself going to university eventually?
- Are you more into academic work or practical hands-on activities?

I can help you narrow down a path based on that! 😊
