

Uddannelsesvalg efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Austria. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great and thoughtful question! Since you're at an important crossroads after finishing primary school (folkeskolen) in Denmark, I can help you consider your options. Let's break it down:

Your Options After Primary School in Denmark

In Denmark, after 9th or 10th grade, students typically choose between:

1 General upper secondary education (gymnasiale uddannelser)

- **STX** (Studentereksamen): Broad academic education, good for university later.
- **HHX** (Higher Commercial Examination): Focus on business, economics, marketing.
- **HTX** (Higher Technical Examination): Focus on technology, science, engineering.
- **HF** (Higher Preparatory Examination): Shorter program (2 years), often for adults or those who want a more practical route to higher education.

2 Vocational education and training (erhvervsuddannelser / EUD)

- Combines school + apprenticeship. Good if you want to work in skilled trades, IT, health care, etc.
- Leads to a job qualification but also allows for further study (e.g., erhvervsakademi, professionsbachelor).

Factors to Consider

Since you're 16, fluent in Danish, and have ties to both Denmark and Austria, here are questions that could guide your decision:

- ✓ Do you prefer academic study, or do you like hands-on, practical learning?
- ✓ Are you already passionate about a subject—science, arts, business, technology?
- ✓ Do you want the option to study at university later (in Denmark, Austria, or elsewhere)?
- ✓ How do you like to learn: in the classroom, in workshops, or through apprenticeships?

My Recommendations (Based on What You Shared)

 **If you want to keep doors open and are interested in a broad academic education:**

Consider **STX** — It gives you the flexibility to apply for a wide range of university programs in Denmark,

Austria, or beyond. You can choose between different study lines (e.g., science, languages, social sciences).

👉 **If you're curious about business or economics:**

Consider **HHX** — Especially useful if you might want to work in international business or study economics, marketing, or management.

👉 **If you're into technology, science, or engineering:**

Consider **HTX** — It's a good path if you see yourself in a technical or scientific career.

👉 **If you want practical, hands-on experience soon:**

Look at **EUD** or **EUX** (which combines vocational training with the option to continue to higher education).

For example, if you like IT, design, carpentry, mechanics, hospitality, etc., this could be a great path.

 Extra tip: Your Austrian background

Since you have Austrian roots, you might also think about whether you'd like to study or work in Austria one day. Most Danish upper secondary educations (especially STX, HHX, HTX) will be recognized if you later apply for university in Austria.

✨ **Final Thought**

It's perfectly okay if you're not 100% sure yet. Many students try out a particular school or program and then adjust if they find out it's not the right fit.

👉 **If you'd like, I can:**

- Help you compare specific schools or programs near where you live.
- Make a list of pros and cons for the different paths.
- Give tips on how to talk to guidance counselors or visit open house events (brobygning).

Would you like help with that? Or do you have specific interests or goals in mind already? 😊
