

Uddannelsesvalg i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Benin. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing a bit about yourself! It's great that you're reflecting on your next steps at this important stage. Let's break it down thoughtfully so you can make a decision that fits **your strengths, interests, and goals**.

Your options after primary school in Denmark

Since you've finished **9th or 10th grade (folkeskolen)**, you typically have these main pathways:

1 Gymnasiale uddannelser (Upper Secondary School) – academic track that prepares you for university

- **STX (Almen studentereksamen)** – broad academic program (languages, science, social studies)
- **HHX (Højere handelseksamen)** – business, economics, marketing focus
- **HTX (Højere teknisk eksamen)** – technical/science subjects
- **HF (Højere forberedelseksamen)** – shorter, 2-year program, often for adults but some young students choose it

✓ **Good if:** you want to keep doors open for university or higher education

2 Erhvervsuddannelser (Vocational education and training - EUD) – combines school and apprenticeship in a company

- Examples: electrician, chef, carpenter, hairdresser, social worker assistant

✓ **Good if:** you prefer practical learning and want to start working sooner, possibly continuing later with a vocational academy or professional bachelor

3 Kombinerede forløb (EUX) – combines vocational training **and** gymnasial level exams

- You get both a trade qualification **and** a studentereksamen

✓ **Good if:** you want to learn a trade but still keep university options open

How to choose?

Here are some questions that can help:

- **What subjects do I enjoy most?** (e.g. math, science, languages, arts, business)
- **Do I like practical, hands-on work, or academic/theoretical study?**
- **Do I want to go to university later?**
- **Do I want to start working earlier, or take more time to study?**

✨ **My recommendation (based on what you've shared)**

Since you're fluent in Danish, have grown up in Denmark, and have just finished primary school, I'd suggest:

➡ **If you're unsure and want to keep options open:**

👉 STX or HTX (if you like science/technology)

➡ **If you like business or want to work internationally (which might connect to your Beninese background too):**

👉 HHX

➡ **If you prefer practical learning but still want access to higher education:**

👉 EUX

🌍 **Other considerations**

✅ Your multicultural background can be a strength — for example, language studies, international business, or social work might be good fits.

✅ In Denmark, guidance counselors (uddannelsesvejledere) at *Ungdommens Uddannelsesvejledning (UU)* can help — I recommend talking with one!

👉 **If you want, tell me more about your interests or what you dream of doing — I can give a more specific suggestion!**

Would you like help thinking about possible careers or subjects you could focus on?
