

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Brunei Darussalam. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a thoughtful question — it's great that you're reflecting on your next steps! Since you've just finished primary school in Denmark (which typically ends at around age 15-16, so I assume you're referring to **folkeskolen** or the **10th grade**), you're at an important decision point.

Let's look at the main options in Denmark after primary school, and I'll also highlight what might fit you depending on your interests, strengths, and ambitions.

Main educational paths after folkeskolen

1 Gymnasiale uddannelser (Upper secondary school / general education)

These are for students aiming for higher education (e.g. university).

- **STX (Almen studentereksamen)** – broad general education: sciences, humanities, social sciences, languages.
- **HHX (Handelsskolens studentereksamen)** – focus on business, economics, marketing.
- **HTX (Teknisk studentereksamen)** – focus on technology, natural sciences, IT, engineering.
- **HF (Højere forberedelseseksamen)** – a shorter, more practical 2-year option for students who want higher education but prefer a less academic or more mature environment.

✓ *Recommended if:* you enjoy school subjects and want the option of university later.

2 Erhvervsuddannelser (Vocational education and training)

A combination of school and apprenticeship in a company.

Examples: electrician, carpenter, hairdresser, chef, social care worker, IT-supporter, etc.

✓ *Recommended if:* you like hands-on learning, want to work sooner, or want to learn a trade or craft.

3 Kombinerede forløb (EUX)

A mix: you get a vocational qualification **and** a studentereksamen-level diploma (both a trade and the option for higher education).

✓ *Recommended if:* you want practical training but also want to keep the door open to university/college.

Considering your background and situation

- You're fluent in Danish, which gives you full access to all educational paths without language barriers.
- Since you have roots in both Denmark and Brunei Darussalam, you might consider paths that could connect you internationally (e.g. HHX, HTX, or STX with language or international studies).
- Think about your interests: Do you enjoy academic work (reading, writing, theory)? Or do you prefer practical, applied learning?

What I recommend

- 👉 If you're unsure and want to keep your options open: **STX** is a safe and flexible choice.
- 👉 If you're interested in business, international trade, or economics: **HHX** could fit well.
- 👉 If you love technology, science, or IT: **HTX** is worth considering.
- 👉 If you want to get into a job faster or like practical work: **EUD** (vocational) or **EUX** (vocational + academic) might suit you.

Final tip

Since you have a multicultural background, think about schools that offer **international programs** (e.g. IB – International Baccalaureate, or schools with exchange opportunities). This could give you valuable experience connecting Denmark and Brunei or other countries.

👉 **Next step:** It would be great for you to visit some school open days (**åbent hus**) or talk with a **UU-vejleder** (youth guidance counselor). They can help you tailor the path to your strengths.

If you tell me more about your interests (e.g. Do you like science? Art? Helping people? Business?), I can give you a more specific suggestion! 😊
