

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Cabo Verde. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great question — and it's wonderful that you're thinking carefully about your future. Let's break this down to give you some guidance based on your situation in Denmark.

🎓 Your options after primary school in Denmark

Since you've finished primary school (9th or 10th grade), your next step is typically one of these paths:

1 Gymnasiale uddannelser (Upper secondary education / high school)

These are academic programs that prepare you for university. The main types are:

- **STX** (Studentereksamen): Broad focus on languages, social sciences, natural sciences, arts.
- **HHX** (Higher Commercial Examination): Focus on business, economics, and international trade.
- **HTX** (Higher Technical Examination): Focus on technology, natural sciences, and technical subjects.
- **HF** (Higher Preparatory Examination): A shorter 2-year program, more flexible and practical.

2 Erhvervsuddannelser (Vocational education and training - VET / EUD)

These programs combine school and paid apprenticeship/work experience in a company. They lead to skilled trades or professions, such as electrician, carpenter, chef, or healthcare assistant.

3 Other paths

- **Kombineret forløb / eux**: Combines vocational training with a high school diploma, so you can both work and go on to university.
- **Specialized programs** (if you have a specific talent or interest, e.g. music, sports).

😞 Things to consider

Ask yourself:

- Do I enjoy academic subjects and want to go to university? → STX, HHX, HTX, or HF could be a good fit.
- Am I more hands-on and want to start working earlier while learning? → VET (EUD) or EUX.
- What are my interests? Science, tech, business, arts, languages?
- Do I want to study abroad later (e.g. maybe in Cabo Verde or another country)? Some programs are better recognized internationally.

☀️ My recommendation

Since you're fluent in Danish, born and raised in Denmark, and have completed primary school successfully:

- ✅ **If you like studying and want to keep your options open for university** → Consider **STX** for general academic education, or **HTX** if you like science/technology.
 - ✅ **If you're interested in business or international trade** → HHX could be great (especially as you might want to connect Denmark and Cabo Verde in your future career).
 - ✅ **If you want both work and study** → EUX is a very good modern option — you can learn a trade but also qualify for university.
 - ✅ **If you prefer a practical job soon and aren't interested in university right now** → Vocational training (EUD) is respected and leads to good jobs.
-

🌐 Your Cabo Verde heritage

Maybe you could think about:

- Studying subjects that help you build bridges between Denmark and Cabo Verde (e.g. international business, development, languages).
 - Learning Portuguese or Kriolu (if you don't speak them already) to strengthen your connection to Cabo Verde.
-

Next steps

- ➡ **Visit open house events** at gymnasiums or vocational schools in your area.
- ➡ **Talk to a UU-vejleder** (educational guidance counselor — they can help you decide).
- ➡ **Ask people in jobs you admire** what path they took.

If you tell me about your interests (e.g. "I love science" / "I want to help people" / "I like working with my hands"), I can give you a more specific recommendation!

Would you like help narrowing it down? 😊
