

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Cambodia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great and thoughtful question — I'm glad you're considering your options carefully! Since you just finished primary school in Denmark at age 16, you're at an important crossroads where your next choice can shape your future. Let me break down your options and give you some guidance based on what I know about the Danish educational system and your situation.

📌 Main educational paths after primary school in Denmark

1 Gymnasium (General Upper Secondary School)

- **What it is:** Focuses on academic subjects like math, science, languages, social studies, etc. Prepares you for university.
- **Examples:** STX (general), HHX (business/economics focus), HTX (technical/science focus).
- **Good for you if:** You enjoy studying, want to keep doors open to university, and are not sure yet what you want to work with.

2 EUD (Erhvervsuddannelse / Vocational Education and Training)

- **What it is:** Prepares you for specific trades (e.g., electrician, carpenter, hairdresser, chef, etc.) through a mix of school and apprenticeship.
- **Good for you if:** You prefer practical, hands-on learning and want to enter the job market earlier.

3 EUX (Combined Vocational + Academic Program)

- **What it is:** A mix of vocational training and academic subjects that also qualifies you for university.
- **Good for you if:** You want both practical skills and the option to study at university later.

4 Other options

- **International Baccalaureate (IB):** Taught in English, internationally recognized.
- **Specialized schools (e.g. art schools, sports schools)** if you have a talent in a specific area.

😞 What to consider when choosing

✅ What are your interests?

Do you like academic study (e.g., reading, writing, research)? Or are you more hands-on and like to build, create, or work practically?

✅ **Do you want to go to university later?**

If yes → Gymnasium or EUX could be good fits.

If no → Vocational education (EUD) might get you into work faster.

✅ **What kind of learning style suits you?**

If you prefer theory and study → Gymnasium

If you prefer practical learning → EUD or EUX

✅ **Do you have a dream job or area?**

If you already know what you want to do, let's match the path to that!

🌟 **My recommendation**

Since you're fluent in Danish and grew up in Denmark, you have full access to the same opportunities as your classmates. If you're unsure what you want to do yet, I recommend:

👉 **Consider starting in Gymnasium (STX or HTX)** to keep your options open for university, especially if you enjoy academic subjects.

👉 **Explore EUX if you like the idea of combining practical work with the chance to go to university.**

👉 **Visit school open houses and talk to a guidance counselor (UU-vejleder)** — they can help you find what suits you!

If you'd like, you can tell me:

- What subjects do you enjoy most?
- Do you have any idea what kind of job or field interests you?
- Do you prefer working with people, technology, art, business, nature...?

Then I can give an even more personalized suggestion! 😊
