

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Canada. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing a bit about yourself — that helps me give a thoughtful recommendation! Since you're 16, have completed primary school in Denmark, and are fluent in Danish, you now stand at an exciting crossroads. Let's break down your options and factors to consider.

Typical educational paths after primary school in Denmark

After *folkeskole* (primary and lower secondary school), you generally have these main options:

1 Gymnasiale uddannelser (Upper secondary education - academically oriented)

These prepare you for university:

- **STX (Alment gymnasium)** – broad, academic focus; good if you're unsure what to study later.
- **HHX (Handelsgymnasium)** – focus on business, economics, and languages.
- **HTX (Teknisk gymnasium)** – focus on science, technology, and innovation.
- **HF (Højere forberedelseseksamen)** – shorter (2 years), often for those wanting to move faster toward further education.

2 Erhvervsuddannelser (Vocational education and training - VET)

- Combine school with apprenticeship.
- Leads to skilled trades (e.g., electrician, carpenter, chef, hairdresser).
- Can also open routes to further education.

3 International options

- International Baccalaureate (IB) – English-language program with international recognition.
- Private or international schools, though usually requiring tuition.

What to consider when choosing

Your interests

- Do you enjoy academic subjects (math, languages, science, humanities)? → STX, HTX, HHX, IB.
- Do you like hands-on work or want to start working earlier? → VET or EUX (a hybrid where you can both learn a trade and qualify for university).

👉 Your long-term goals

- Want to go to university in Denmark or abroad (e.g., Canada)? → STX, IB, HTX, HHX.
- Want to enter the workforce earlier? → VET.

👉 Language and international opportunities

- Since your parents are Canadian, you might consider IB — it keeps the door open for university in Canada (or other countries).

🌟 My tailored recommendation

Given:

- ✓ You're fluent in Danish.
- ✓ You have Canadian roots — international study might appeal.
- ✓ You've completed primary school and are exploring next steps.

👉 Consider either:

- **STX** if you want flexibility, broad academic preparation, and Danish university access.
- **IB** if you want an internationally recognized diploma and may consider studying in Canada, another country, or an international career.

👉 Or:

- **HHX/HTX** if you already know you love business/economics (HHX) or science/tech (HTX).

👉 Or:

- **VET/EUX** if you're eager to learn a trade with practical experience *and* still want the option of higher education.

🌱 Next steps

- ✓ Attend info meetings at local schools (gymnasier, VET centers).
- ✓ Talk to your school counselor (UU-vejleder).
- ✓ Maybe try a "brobygning" (bridge course) or short internship to get a feel for different options.

💬 **If you want, tell me more about your interests or dreams — I can help narrow it down further!**
Do you see yourself at university, working with people, in business, science, art, technology?
