

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Central African Republic. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a really thoughtful and important question — I'm glad you're thinking carefully about your next step! Let's break it down so you can make a choice that fits **your interests, strengths, and future goals**. Since you've just finished primary school in Denmark (or more precisely, *folkeskole*), you have several main options. I'll also include some guidance based on your background and potential opportunities:

Your main educational options after primary school

In Denmark, after *folkeskole* (typically 9th or 10th grade), students can choose among:

1 Gymnasiale uddannelser (Upper Secondary Education)

These are academic programs preparing you for university. Examples:

- **STX (Alment gymnasium)** – general upper secondary school with focus on sciences, humanities, and languages.
- **HHX (Handelsskole)** – focus on business, economics, international trade.
- **HTX (Teknisk gymnasium)** – focus on technology, science, IT.
- **HF (Højere Forberedelseseksamen)** – shorter, 2-year general program (often for older students or those wanting more practical orientation).

 *Good if you want to keep many options open, go to university, or are interested in academic subjects.*

2 Erhvervsuddannelser (Vocational Education and Training, EUD)

Combines school and apprenticeship in a company (praktikplads). Examples:

- Carpenter, electrician, hairdresser, chef, healthcare assistant, etc.
- You earn a salary during your apprenticeship.

 *Good if you prefer hands-on learning and want to get into the workforce faster.*

3 Kombinerede forløb (EUX)

A combination: vocational training + upper secondary exam → you can both work in a trade or continue to university.

👉 Good if you want the best of both worlds.

🚀 Things to think about before choosing

✅ What subjects do you like best?

Do you enjoy science, math, languages, social studies, practical work, creative projects?

✅ How do you prefer to learn?

Do you like books, theory, and academic work — or working with your hands and seeing concrete results?

✅ Future dreams?

Do you already have an idea (engineer, doctor, teacher, chef, entrepreneur)? Or do you want to keep options open?

✅ Role models / family input?

Talk to your parents, teachers, and maybe older students who've chosen different paths.

🌍 Special considerations for you

- With your multicultural background and fluency in Danish, you may have unique strengths in languages, international relations, business, or social work.
- Denmark also offers mentoring and support programs for young people with ethnic minority backgrounds — worth checking with your school counselor (*UU-vejleder*).
- Some programs have international or bilingual options (e.g., international HHX or STX with global focus).

📝 Suggested next steps

1 **Contact your UU-vejleder (Youth Guidance Counselor)** — they can help you explore and even arrange visits to schools or apprenticeship companies.

2 **Visit open house events at gymnasiums and vocational schools** — see what feels right.

3 **Consider a 10th grade if you feel unsure or want to strengthen a subject.**

💡 Summary

👉 If you enjoy studying and want to keep the door open to university: **STX, HHX, or HTX**

👉 If you want to work with your hands and start earning faster: **EUD**

👉 If you want a mix: **EUX**

If you tell me a bit about:

- What subjects you like at school
 - What jobs or fields interest you
- I can give you more personalized recommendations!

Would you like help exploring specific schools or programs near where you live in Denmark? 😊
