

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Chad. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing a bit about yourself — it's great that you're thinking carefully about your next step! Let's break it down so I can give you helpful advice.

Typical education paths in Denmark after primary school

Since you've completed **folkeskolen** (primary/lower secondary school), you usually have these main options:

Gymnasiale uddannelser (general upper secondary education)

- **STX** (studentereksamen) – general academic education, broad range of subjects (humanities, science, social studies).
- **HHX** (higher commercial examination) – focus on business, economics, marketing.
- **HTX** (higher technical examination) – focus on technology, science, engineering.
- **HF** (higher preparatory examination) – shorter (2 years), for those wanting to prepare for higher education with a more practical approach.

 *These paths prepare you for university or other higher education.*

Erhvervsuddannelser (vocational education and training, VET)

- Combine practical training (apprenticeship) and school.
- Examples: electrician, carpenter, healthcare assistant, chef, IT supporter.

 *Good if you want to work sooner, learn a trade, or prefer hands-on learning.*

Kombinerede forløb (EUX)

- Combines VET + gymnasial level so you get both a trade and access to higher education.

How to choose?

Here are some things to think about:

 **What are you interested in?** (e.g., science, technology, business, art, social studies, working with people, practical work)

- ✓ Do you enjoy schoolwork, books, exams — or do you prefer hands-on, practical learning?
 - ✓ Do you already have a career dream (engineer, teacher, entrepreneur, mechanic)?
 - ✓ How do you like to work — team, independent, creative, technical?
-

💡 My recommendation

Since you're fluent in Danish and have completed folkeskolen, you have **all options open**.

👉 If you like academic subjects and want the opportunity to go to university:

→ **STX** (broadest), **HHX** (if you like business/economics), or **HTX** (if you're into science/tech).

👉 If you prefer practical learning or want to start working sooner:

→ **VET (erhvervsuddannelse)** or **EUX** (if you want both a trade + future higher education option).

👉 If you're unsure:

→ Visit **open house events (åbent hus)** at local gymnasier and erhvervsskoler.

→ Talk to a **UU-vejleder (educational guidance counsellor)** — they can help match your interests.

🌟 Final advice

Since you're young and the Danish system is flexible, don't worry too much about getting it 100% right on the first try — you can always change direction.

If you'd like, tell me:

- What subjects do you enjoy most?
- Do you have any dream job or idea of what you want to do?
- Do you like schoolwork or more practical tasks?

Then I can give you a more tailored suggestion! 🚀
