

Uddannelsesvalg i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Chile. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a thoughtful and important question — and it's great that you're already thinking carefully about your future! Since you just finished primary school (or *folkeskole*), you're at a natural point to choose the next step in your educational journey. Let's break it down based on the Danish system and your situation:

Your options after folkeskole

In Denmark, after 9th or 10th grade, young people typically choose between:

✓ **Gymnasiale uddannelser (general upper secondary education)**

These are academically focused and prepare you for higher education:

- **STX** (*studentereksamen*): Broad academic program (languages, science, social science, arts).
- **HHX**: Business- and economics-focused.
- **HTX**: Focus on technology, science, and innovation.
- **HF**: Shorter, more flexible, often for those wanting to return to school later or take a more practical path toward higher education.

✓ **Erhvervsuddannelser (vocational education and training, VET / EUD)**

- Combines school with apprenticeship/traineeship at a company.
- Leads directly to skilled work or further studies.
- Wide range: crafts, hospitality, IT, health care, technical fields.

✓ **Kombinationsuddannelser (e.g., eux)**

- Mix of VET and academic education — gives you both a trade qualification and the right to apply for higher education.

How to choose?

Since you're fluent in Danish, well-integrated, and just finished primary school, the right path depends on:

- **Your interests:** Do you enjoy academic subjects (math, science, literature)? Or do you like practical, hands-on work?

- **Your future goals:** Do you see yourself at university? Or do you want to enter the workforce with a skilled trade? Or maybe you're not sure yet — and that's okay!
 - **Your learning style:** Do you thrive with classroom learning, or do you prefer learning by doing?
-

🌟 Recommendation

Since you're exploring options and might want to keep doors open, you might consider:

- 👉 **STX** if you enjoy a broad academic education and want to keep university options open.
- 👉 **HHX** if business, economics, or international trade interests you (this could connect nicely to Chile/Denmark links).
- 👉 **HTX** if you like science, technology, or engineering.
- 👉 **EUX** if you want both a trade qualification *and* the ability to study at university later.

If you feel unsure, **10th grade** (*10. klasse*) could give you extra time to explore interests, gain maturity, and prepare for upper secondary.

🌍 Special note: your Chilean background

Your bilingual/multicultural background is a strength!

- Consider learning or improving your Spanish (if you don't already speak it fluently) — this could open doors in international business, diplomacy, or NGOs.
 - You might also look at exchange programs or international options (some gymnasier have IB programs).
-

! Next steps

- Attend open house events at gymnasiums or VET schools (*introdage / brobygning*).
 - Talk with your school counselor (*UU-vejleder*).
 - Think about doing job shadowing or internships to try different fields.
-

If you tell me about your interests (e.g. subjects you like, hobbies, future dream job), I can give a more tailored recommendation! 🚀
