

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Congo. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's great that you're thinking carefully about your next steps! Since you've finished primary school in Denmark at 16 (which suggests you've completed *folkeskolen*), you now have several good options depending on your interests, strengths, and future goals. Let me guide you through the main educational paths you might consider:

1 Gymnasiale uddannelser (Upper secondary general education)

If you enjoy academic subjects and think you might want to go to university later, one of these programs could be ideal:

- **STX (studentereksamen)** – general upper secondary with broad subjects (sciences, humanities, social sciences).
- **HHX (higher commercial examination)** – focuses on business, economics, marketing, and languages.
- **HTX (higher technical examination)** – focuses on technology, science, and innovation.
- **HF (higher preparatory examination)** – shorter (2 years), often for those who want a more flexible path or who didn't follow the typical path to STX/HHX/HTX.

 *Best for:* If you like school subjects and want to keep many options open for university or further education.

2 Erhvervsuddannelser (Vocational education and training)

If you're more interested in practical skills and want to train for a job while learning (often through apprenticeships), you could consider:

- **EUD (vocational education and training)** – many options (e.g., electrician, carpenter, chef, hairdresser, social worker assistant, etc.).
- **EUX** – combines vocational training with upper secondary academic subjects, so you can qualify for university too.

 *Best for:* If you want hands-on work experience and a quicker path to employment — but still with the chance for further study via EUX.

3 Other paths

- **International programs (IB or other international schools)** – if you want to study in English and perhaps think about studying abroad later.
- **10. klasse** – if you want an extra year to mature, figure out your goals, or improve in certain subjects.

How to decide?

 Think about these questions:

- Do you enjoy theoretical subjects (math, literature, sciences)? → Maybe **STX/HHX/HTX/HF**.
- Do you prefer working with your hands or learning by doing? → Maybe **EUD/EUX**.
- Do you want to go to university or start working earlier?
- Are there specific careers or fields that interest you (e.g., business, healthcare, tech, arts)?

My recommendation

Since you're fluent in Danish, born and raised in Denmark, and at a decision point:

- ✓ If you want to keep many doors open and aren't sure yet, **STX** or **EUX** could be great choices — they give flexibility and a solid foundation.
- ✓ If you already know you want a practical job soon, **EUD** with an apprenticeship could suit you well.
- ✓ If you want to explore international options, an **IB program** is worth looking into.

If you'd like, I can help you:

- Compare schools in your area.
- Explore careers linked to these programs.
- Plan based on your interests (e.g. if you tell me what subjects you like most).

 Would you like help narrowing it down based on your interests or strengths?
