

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Croatia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a really thoughtful question — and it's great that you're reflecting carefully on your next step. Since you've just finished primary school in Denmark (which typically ends at 9th or 10th grade depending on the school), you have several good options depending on your interests, strengths, and future ambitions. Let's break it down!

🎓 Main educational paths after primary school in Denmark

Here are the typical options you can consider:

1 Gymnasiale uddannelser (Upper secondary general education)

If you're interested in academic subjects and possibly university later on:

- **STX (Almen studentereksamen)** — broad, general upper secondary education with focus on humanities, social sciences, and natural sciences.
- **HHX (Højere handelseksamen)** — upper secondary with focus on business, economics, and international trade.
- **HTX (Højere teknisk eksamen)** — upper secondary with focus on technology and natural sciences.
- **HF (Højere forberedelseksamen)** — shorter (2 years), more practical/thematic, suited if you prefer applied learning and want to enter professions or further education faster.

👉 Who is this good for?

- You enjoy studying academic subjects
- You're considering university or higher education later on
- You like theoretical work or combining it with some practical elements (especially HTX, HHX)

2 Erhvervsuddannelser (Vocational education and training - VET / EUD)

If you prefer practical skills, working with your hands, and want to get a job or skilled trade sooner:

- You combine school and apprenticeship (praktik) in a company.
- Paths include: carpenter, electrician, chef, healthcare assistant, IT supporter, mechanic, etc.

👉 Who is this good for?

- You want to learn by doing

- You'd like to start working and earning sooner
- You prefer a hands-on environment

Kombinationsuddannelser

Some programs combine gymnasium and vocational elements (e.g. EUX), so you can keep both university and trade pathways open.

Who is this good for?

- You want both a studentereksamen and a vocational qualification
- You're ambitious and want flexibility

How to choose?

Consider:

- ✓ What subjects do you enjoy most?
- ✓ Do you prefer theory, practice, or a mix?
- ✓ Do you see yourself at university later, or starting work sooner?
- ✓ Do you like working with people, technology, numbers, or creativity?

Extra considerations

- Your bilingual/multicultural background (Danish + Croatian) is a strength. It could be useful in international business (HHX), language studies (STX), or hospitality sectors.
- If you're unsure, you can visit **uddannelsesguiden.dk** (UG.dk) or talk to an **UU-vejleder** (educational guidance counselor) — they can give personalized advice.

My recommendation

Since you're just finishing primary school and seem thoughtful about your future, you could consider:

-  **STX or HHX**, if you enjoy academic learning and want to keep your options open for university.
-  **EUX**, if you want both an academic and vocational qualification at the same time.
-  **Erhvervsuddannelse (EUD)**, if you already know you want a specific trade and like practical learning.

 **Final tip:** If you'd like, I can help you:

- Explore specific subject combinations (e.g. STX science vs language focus)
- Find schools near where you live
- Draft a plan towards a career you have in mind

Would you like to tell me a bit more about your interests or dream job? 😊
