

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Dominica. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's great that you're thinking carefully about your next steps! Since you've just finished primary school in Denmark (which means you've completed **folkeskole**), you have several good options depending on your interests, strengths, and future ambitions. Let's break it down clearly:

Your main educational options after primary school in Denmark

1 Gymnasiale uddannelser (Upper secondary education)

These programs prepare you for higher education (university, etc.)

- **STX (Almen studentereksamen)** – General academic program with a broad range of subjects (humanities, natural science, social science).
- **HHX (Højere handelseksamen)** – Focus on business, economics, and international trade.
- **HTX (Højere teknisk eksamen)** – Focus on technology, science, and engineering.
- **HF (Højere forberedelseseksamen)** – A shorter, more practical program (2 years), often for those who prefer a less theoretical path to higher education.

 *Good if you want to keep many doors open towards university or higher studies.*

2 Erhvervsuddannelser (Vocational education and training / EUD)

- These are apprenticeships combined with school, preparing you for specific jobs (crafts, technology, care professions, hospitality, etc.).
- You can start working right after or continue to advanced programs (EUX combines vocational training + upper secondary academic courses).

 *Great if you want hands-on work experience and maybe start working earlier.*

3 Special options

- **EUX** (a combination of vocational and gymnasial education — gives you both a trade qualification and university entrance exam).
- **International programs / IB (International Baccalaureate)** if you are interested in a more global perspective (but you'd need strong English skills).

🤔 What to consider when choosing

- ✓ What subjects interest you the most? (e.g., languages, science, technology, business, art)
 - ✓ Do you prefer practical/hands-on learning or academic/theoretical learning?
 - ✓ Are you thinking about university later on, or would you rather enter the workforce earlier?
 - ✓ Do you want to explore areas connected to your cultural background — e.g., international business, languages, global studies?
-

💡 Recommendation

Since you're fluent in Danish, born and raised in Denmark, and (I assume) have no major language or academic challenges:

- If you want to keep your options wide open → **STX** or **EUX**
 - If you love business or want to connect with international trade (maybe between Denmark and Dominica or the Caribbean?) → **HHX**
 - If you are into science, technology, or engineering → **HTX**
 - If you want to get a trade + academic possibilities → **EUX**
 - If you are eager to enter a skilled profession soon → **EUD**
-

🌍 Extra thought

Since you have family roots in Dominica, you might consider paths that could let you work internationally — HHX, STX, or IB could be great for that.

If you tell me more about what subjects you enjoy, your hobbies, or if you're thinking of university or work after school, I can help refine this advice! Would you like to explore that? 😊
