

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Equatorial Guinea. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great and thoughtful question — and it's wonderful that you're already planning your future! Since you just finished primary school (or perhaps *folkeskolen* if you mean 9th or 10th grade in Denmark), you're at a natural point to consider your options. Let's break it down so you can choose what suits your interests, strengths, and dreams.

Main educational paths after primary school in Denmark

Here are the typical choices students your age make:

Gymnasiale uddannelser (Upper secondary general education)

If you're interested in going to university later, this could be a good path. Options include:

- **STX (Alment gymnasium)** – Broad academic focus (humanities, sciences, languages).
- **HHX (Handelsgymnasium)** – Focus on business, economics, and international studies.
- **HTX (Teknisk gymnasium)** – Focus on science, technology, and technical subjects.
- **HF (Højere forberedelseseksamen)** – Shorter, more practical upper secondary program (2 years, often for adults or those wanting a quicker route).

Erhvervsuddannelser (Vocational education and training)

If you like hands-on learning and want to enter a trade or profession directly, this is a great choice.

Examples:

- Carpenter, electrician, chef, hairdresser, social and healthcare assistant, etc.
- You can also combine vocational training with the option to continue to higher education.

Kombinerede forløb / EUX

EUX combines vocational training with a gymnasial level education, so you can both learn a trade and keep the door open for university.

Things to consider

- **What are your interests?** Do you love science, technology, art, languages, business, social sciences?
- **How do you like to learn?** Do you prefer academic study, or do you enjoy practical, hands-on tasks?

- **What is your long-term vision?** Do you dream of being an engineer, doctor, entrepreneur, artist, technician, or something else?
-

Possible ideas based on your background

Since you're fluent in Danish and have multicultural roots:

- You might thrive in **international business (HHX)** if you're interested in combining Danish and global perspectives.
 - If you're passionate about technology, innovation, or science, **HTX** could give you a strong technical foundation.
 - If you're not sure yet, **STX** is the most general and gives you lots of flexibility.
 - If you enjoy working with people or helping communities, an **erhvervsuddannelse** or **EUX** in healthcare or social services might be inspiring.
-

Next steps

- ✓ Visit **uddannelsesguiden.dk (UG.dk)** — it's a great resource with info and quizzes.
 - ✓ Attend **open house events (åbent hus)** at local gymnasiums or vocational schools.
 - ✓ Talk to a **UU-vejleder (youth education counselor)** — they can give personal guidance.
-
