

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Honduras. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

Thanks for sharing a bit about yourself—you're in an exciting phase of life! Since you've just finished primary school in Denmark (which typically means you've completed 9th or 10th grade), your next step will likely be choosing a youth education program. Denmark offers several good options, and the best path for you depends on your interests, strengths, and future goals. Here's a breakdown of your main options:

1. Gymnasiale uddannelser (Upper Secondary Education – General)

These programs prepare you for university. Choose this if you like academic subjects and want to keep your options open.

Main types:

- **STX (Studentereksamen)** – General academic subjects (literature, science, history).
- **HHX (Højere Handelseksamen)** – Focus on business, economics, and languages.
- **HTX (Højere Teknisk Eksamen)** – Focus on technology, science, and innovation.
- **HF (Højere Forberedelseksamen)** – A 2-year general education for more mature students or those who didn't finish 10th grade.

✓ Best for you if:

You enjoy school subjects, think you might want to go to university, and want to explore a range of topics.

2. Erhvervsuddannelser (Vocational Education and Training – EUD)

These combine school and hands-on work experience and can lead directly to a job or further education.

Examples:

- Electrician, carpenter, chef, mechanic, healthcare assistant, child care worker.

You'll spend part of your time in school and part of your time in a company as an apprentice (praktik).

✓ Best for you if:

You want to learn by doing, start earning earlier, or like practical skills more than academic study.

3. EUX – Kombination af EUD og gymnasial eksamen

A mix of vocational training and general education. You learn a trade *and* get qualifications that allow you to apply for university.

✅ *Best for you if:*

You want practical skills **and** the option to continue into higher education.

How to Choose?

Here are a few questions to ask yourself:

- Do you like academic subjects like math, science, or history? → Consider **STX**, **HTX**, or **HHX**.
 - Are you curious about business, marketing, or trade? → **HHX** or **EUX Business**.
 - Do you enjoy making things, fixing things, or helping others? → Consider **EUD** or **EUX**.
 - Not sure yet? You can try a **10th grade year** (efterskole or regular) to explore more.
-

✨ **Bonus: Your Background and Opportunities**

Being Danish-born with Honduran roots is a strength! You likely have a broader cultural perspective and maybe even Spanish language skills—which are valuable in business, tourism, and diplomacy. Consider:

- Studying **languages** (Danish, Spanish, English)
 - Looking into **international business or global studies** (via HHX or STX)
 - Becoming a **bridge-builder** in multicultural communities or working abroad later
-

✅ **Next Steps:**

1. Visit **ungdomsuddannelse.dk** or **ug.dk** – official Danish sites to explore education options.
2. Talk to a **UU-vejleder** (youth education counselor) – they're there to help.
3. If you're unsure, a **10th grade year** at a regular school or **efterskole** can give you more time to decide.

Would you like me to help you explore specific career paths based on your interests?
