

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from India. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing a bit about yourself! At 16 and having just finished primary school in Denmark, you're at an exciting point where you can choose the direction that fits your interests, skills, and future goals best.

In Denmark, after completing **primary school (Folkeskole)**, you typically choose between several **youth education programs**. Since you're fluent in Danish and living in Denmark, you have full access to all of them. Here's a breakdown of your main options and who they might suit:

🎓 1. Gymnasiale uddannelser (General Upper Secondary Education)

These programs prepare you for higher education (e.g. university or college).

♦ STX – Studentereksamen

- **Focus:** Broad academic education including humanities, science, and social science.
- **Good for:** If you're interested in university later and don't know exactly what you want to study yet.
- **Duration:** 3 years

♦ HTX – Higher Technical Examination

- **Focus:** Technology, natural sciences, IT
- **Good for:** If you like science, technology, engineering, or math (STEM).
- **Duration:** 3 years

♦ HHX – Higher Commercial Examination

- **Focus:** Business, economics, marketing, international trade
- **Good for:** If you're interested in business, finance, or starting your own company.
- **Duration:** 3 years

♦ HF – Higher Preparatory Examination

- **Focus:** More practical and flexible, often for students who didn't do well academically before or want to study faster.
- **Duration:** 2 years

🔧 2. Erhvervsuddannelser (Vocational Education and Training – EUD)

These are for students who want to get a job quickly or learn a trade (carpenter, electrician, chef, healthcare assistant, etc.).

- **Combines:** School + apprenticeship at a workplace.
- **Good for:** If you want hands-on work and to earn money during your education.
- **Duration:** 2–5 years depending on program.

You can also do **EUX**, which mixes vocational education with academic classes, so you keep your option open for university later.

What to Consider When Choosing:

1. What are your interests?

- Science, technology → HTX
- Business, trade → HHX
- General subjects or languages → STX
- Practical work → EUD or EUX

2. Do you want to go to university later?

- Then STX, HHX, HTX, or HF are better fits.

3. Do you want to start working soon?

- Consider EUD or EUX.

4. Do you have a dream job already?

- If yes, let's talk about it, and I can suggest the best path.
-

Example Paths:

- **Aspiring doctor, engineer, or lawyer** → STX or HTX
 - **Interested in coding or IT** → HTX or EUD (IT specialist path)
 - **Want to start your own business** → HHX
 - **Like to work with your hands (cars, food, people)** → EUD or EUX
-

If you tell me more about what you're good at or enjoy doing (subjects you like, hobbies, dream job ideas), I can give you more personal advice.
