

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Lesotho. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing that about yourself — and congrats on finishing primary school! That's a big milestone. Since you're in Denmark and just completed *folkeskolen* (primary and lower secondary education), your next step usually involves choosing one of the following general paths:

1. General Upper Secondary Education (Gymnasiale Uddannelser)

Ideal if you're considering going to university later.

Options:

- **STX (Alment Gymnasium)** – Broad and academic. Good if you're unsure but want many future study options.
- **HHX (Higher Commercial Exam)** – Focuses on business, economics, and languages.
- **HTX (Higher Technical Exam)** – Focuses on technology, natural sciences, and innovation.
- **HF (Higher Preparatory Exam)** – Shorter, 2 years, often for older students or those who want a quicker path to higher education.

✓ Best if: You like academic subjects, want to keep options open, or aim to go to university.

2. Vocational Education and Training (Erhvervsuddannelse – EUD)

Ideal if you want to start working sooner or like hands-on learning.

Examples of paths:

- Carpenter
- Electrician
- Hairdresser
- IT Supporter
- Social and Health Care Assistant (SOSU)

You spend part of your time in school and part of it as an apprentice at a real workplace (paid internships).

✓ Best if: You prefer practical work, want to earn money while learning, and like more direct paths to a career.

💡 3. Combination Programs (EUX)

This combines vocational training *and* a study-oriented exam, allowing you to both work after and go to university if you want.

✅ Best if: You want both practical skills and academic qualifications. A strong all-around option.

Some Personal Factors to Consider:

- **What are you good at?** (Math, languages, hands-on skills, creativity?)
 - **What interests you?** (Helping people? Business? Technology? Arts?)
 - **Do you want to work soon or study longer?**
 - **Are you open to university later?**
-

📌 My Recommendation (based on what you've shared):

Since you're fluent in Danish, born and raised in Denmark, and just coming out of primary school, you have every opportunity open to you. If you're still exploring your interests:

➡ **STX** or **EUX** might be your best bet.

- **STX** if you're academically strong and want to keep your university options open.
 - **EUX** if you're more hands-on but still want the option to study further later.
-

Would you like help figuring out which path suits your interests or strengths? I can help you with a quick quiz-style guide if you'd like!
