

Uddannelsesvalg efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Malta. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in Danish. What educational path would you recommend for me?

Thanks for sharing a bit about yourself! Since you're 16, fluent in Danish, and just finished primary school in Denmark, you're likely transitioning into what the Danish education system considers **youth education** (ungdomsuddannelse). Here are your main options, each with pros depending on your interests, strengths, and future goals:

♦ 1. Gymnasiale uddannelser (General Upper Secondary Education)

These programs prepare you for **higher education** (university or similar).

Common choices:

- **STX** (Studentereksamen) – Broad academic focus (science, humanities, languages).
- **HHX** (Higher Commercial Examination) – Focus on business, economics, marketing.
- **HTX** (Higher Technical Examination) – Focus on science, technology, and innovation.
- **HF** (Higher Preparatory Examination) – Shorter 2-year program; more flexible, good if you want to study further but need a less intense option.

Recommended if:

- You enjoy academic learning.
- You want to go to university.
- You're not yet sure what you want, but want to keep many doors open.

♦ 2. EUD (Erhvervsuddannelse / Vocational Education and Training)

This is a more practical path where you combine school with internships (praktik). You graduate with skills in a trade, and can work right away or continue studying later.

Fields include:

- IT, construction, auto repair, hairdressing, healthcare, cooking, etc.

Recommended if:

- You prefer hands-on learning.
- You want to work sooner and earn money while studying.

- You have a specific career in mind.
-

◆ 3. EUX (Vocational + Academic Combo)

This combines vocational training (EUD) with academic classes like in STX. You get both a **trade qualification and a general study certificate**.

Recommended if:

- You want both practical skills and the option to study at university later.
 - You want a “best of both worlds” path.
 - You're motivated and organized – it's a demanding path.
-

Some Questions to Ask Yourself:

- Do I like working with my hands or more with books?
 - Am I curious about university, or more interested in getting a job soon?
 - Do I like business, science, tech, art, or helping people?
 - Do I want to study in Denmark or possibly Malta (or elsewhere) in the future?
-

My Advice (based on what you shared):

Since you're fluent in Danish, born in Denmark, and just finishing primary school, the **gymnasiale** programs like **STX** or **HHX** could be a great place to start **if you enjoy school and want to keep many future options open**.

But if you already know you enjoy practical work — like working with technology, design, or people — then **EUX** could be a really smart and flexible option.

Would you like help choosing between STX, HHX, HTX, etc., or exploring options based on specific interests (like tech, healthcare, business, etc.)?
