

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Marshall Islands. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

Thanks for sharing your background — that's a great starting point for figuring out the right path. Since you've just finished primary school in Denmark (9th or 10th grade, depending), your next step depends on your interests, goals, and whether you're more inclined toward academics, hands-on work, or something creative.

In Denmark, your main options after primary school are:

1. Gymnasiale uddannelser (General Upper Secondary Education)

These are for students who want to go to university later.

- **STX (Studentereksamen):** Broad and academic – includes humanities, sciences, and social sciences.
- **HHX (Higher Commercial Examination):** Focus on business, economics, and languages.
- **HTX (Higher Technical Examination):** Focus on technology, science, and IT.
- **HF (Higher Preparatory Examination):** Shorter (2 years), good if you prefer practical subjects or need flexibility.

➔ **Choose one of these** if you want to go to university or keep your options open for higher education.

2. Erhvervsuddannelser (Vocational Education and Training - EUD)

- You split time between school and working as an apprentice.
- Can lead to skilled jobs (e.g., carpenter, electrician, hairdresser, chef, mechanic).
- Also gives you a path to higher education later, especially via **EUX**, which combines vocational training with academic courses.

➔ **Choose this** if you like practical work, want to start working earlier, or want a more hands-on career.

What should you ask yourself?

- **Do you enjoy academic subjects like math, science, history, or languages?** → Go for STX, HHX, or HTX.
- **Do you like working with your hands or doing something creative or technical?** → Consider EUD or EUX.
- **Are you unsure?** → HF is a good 2-year option that keeps doors open.

Other things to consider:

- **Support programs:** Some schools offer help for students from minority backgrounds or bilingual homes. Ask if your local school has mentors or resources.
 - **Explore your interests:** Think about what you enjoy doing, even outside school — video editing, helping others, fixing things, numbers, writing, etc.
 - **Don't rush:** It's okay to take time to explore or even take a 10th-grade year (efterskole or normal 10th grade) if you're unsure.
-

Example paths:

1. You like science and want to maybe go to university:

→ HTX

2. You're interested in business or want to be an entrepreneur:

→ HHX

3. You like working with your hands and want to start a job earlier, but maybe study later:

→ EUD or EUX

4. You're unsure and want a short academic route:

→ HF

If you tell me more about your interests or dreams (even vague ones), I can help narrow it down more.
