

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Namibia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

That's a great question—and an exciting point in your life! Since you're 16, fluent in Danish, and have just finished primary school in Denmark, you're at the typical age and stage where many young people move on to **youth education** (ungdomsuddannelse). In Denmark, you have several strong options depending on your interests, strengths, and long-term goals.

Here's an overview of the **main educational paths** you can consider:

1. Gymnasiale uddannelser (General Upper Secondary Education)

These are academic and prepare you for higher education (university, college).

- **STX (Studentereksamen):** Broad academic program with a strong focus on humanities, social sciences, and sciences. Good if you're not sure what to study later.
- **HHX (Higher Commercial Examination):** Focus on business, economics, and languages. Good if you're interested in commerce or entrepreneurship.
- **HTX (Higher Technical Examination):** Focus on technology, natural sciences, and innovation. Great if you're into tech, science, or engineering.
- **HF (Higher Preparatory Examination):** Shorter (2 years) and more practical. Often chosen by students who want to move on to medium-length professional programs.

✅ **Recommended if:** You want to go to university or explore academic interests.

2. Erhvervsuddannelser (Vocational Education and Training – EUD)

These combine school and apprenticeship with real-world work experience. You learn a trade or profession and can often start working right after.

- Examples: Electrician, carpenter, hairdresser, IT-supporter, social- and healthcare assistant (SOSU), etc.
- Some programs allow you to continue to **EUX**, which combines vocational training with academic subjects so you can also go to university later.

✅ **Recommended if:** You want to work sooner, like hands-on learning, or are interested in a skilled trade.

3. International or Specialized Programs

Some schools offer **international programs**, especially in bigger cities. This can be an interesting path if you're thinking globally or want to keep options open abroad.

✓ **Recommended if:** You are comfortable with English and want an international career.

🔍 A Few Questions to Help You Choose:

1. **Do you want to go to university later?**
→ Then STX, HHX, HTX, or HF is usually the best fit.
2. **Do you like working with your hands or solving practical problems?**
→ Then EUD or EUX could be perfect.
3. **Are you unsure what you want to do long-term?**
→ STX or HF keeps more doors open.
4. **Are you interested in helping others (nursing, childcare, etc.)?**
→ SOSU programs or HF with a healthcare focus could suit you.

🌍 Your Namibian Heritage – Bonus Opportunity

You also have a cultural and linguistic advantage from having a background in Namibia. This could open future doors in international relations, development work, or cultural exchange. If you're interested in that, HHX or STX (with a focus on languages or social sciences) might support that goal well.

My Honest Recommendation (Based on What You've Shared)

Since you're fluent in Danish, born and raised in Denmark, and just finished primary school, I recommend you look into:

STX – if you want the broadest academic preparation and aren't sure yet what you want to study.

EUX – if you're interested in a job-ready education but also want the option to go to university later.

HHX – if you're curious about business, economy, or would one day want to start your own company.

Would you like help finding specific schools or programs near you in Denmark? Or would you like to explore what career paths align with your interests?
