

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Nepal. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that – it's great that you're thinking about your future already. Since you've just finished **primary school in Denmark** (probably meaning **9th grade**, and you're around **16**), you're at the stage where most students choose between a few key **educational paths**. Here's a breakdown of your **options**, along with **recommendations** depending on your interests and goals.

Your Main Options After Primary School

In Denmark, after finishing **Folkeskole**, students typically choose one of the following:

1. Gymnasiale Uddannelser (General Upper Secondary Education)

If you want to go to university later.

- **STX (Studentereksamen)**: Focuses on academic subjects like languages, science, humanities.
- **HHX (Higher Commercial Examination)**: Focuses on business, economics, marketing.
- **HTX (Higher Technical Examination)**: Focuses on science, technology, and innovation.
- **HF (Higher Preparatory Examination)**: Shorter (2 years), more flexible – often used if you didn't go straight into another program after 9th/10th grade.

2. Erhvervsuddannelse (Vocational Education and Training - EUD)

If you prefer hands-on learning and want to work sooner (with option for further study later).

- Includes trades (electrician, carpenter, hairdresser), healthcare, IT, and more.
- Combines school and apprenticeship.
- Some programs allow you to move on to higher education (e.g., via **EUX** – a hybrid that gives both vocational training and academic qualifications).

My Recommendation (Based on Your Background & Opportunities)

If you're open to university and unsure of your long-term goals:

→ **Choose STX, HHX, or HTX** (depending on your interests):

- If you enjoy **science or technology**, go for **HTX**.
- If you're into **business, finance, or marketing**, consider **HHX**.

- If you're interested in **languages, history, or general academics**, **STX** is a good fit.

These keep **more doors open**, especially if you later decide to go to university, college, or even study abroad (which could be interesting with your multicultural background).

If you prefer practical learning and want to work sooner:

→ **Go for EUD or EUX.**

- If you're interested in specific jobs like electrician, chef, or IT technician, this is a strong path.
- **EUX** is great if you want the **hands-on experience** *and* the option to go to university later.

As someone with Nepalese heritage...

Being bilingual and bicultural is a huge advantage! You might consider paths that make use of your background:

- International business (HHX → university)
- Social work or education (STX/HF → professions like teacher or social worker)
- Global development or public health (STX/HTX → university programs with international focus)

Final Tips

- **Visit educational fairs or open house events (Åbent Hus)** at local schools to get a feel for what fits you.
- **Talk to a guidance counselor (studievejleder)** – they're trained to help you map out options based on your interests and grades.
- If you're unsure now, that's totally normal. Choose a path that keeps your options open.

Would you like me to help you narrow it down based on your interests or subjects you enjoy?
