

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Nicaragua. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's a big and exciting decision—well done on finishing primary school! Since you're 16 and living in Denmark, you're at a key point in the Danish education system, where most students choose between a few main paths after **Folkeskole** (primary and lower secondary school).

Here are your main options:

1. Gymnasiale uddannelser (General Upper Secondary Education)

These are aimed at students who want to go to university later.

- **STX (Studentereksamen):** Focuses on a broad mix of subjects—good if you're still figuring out what interests you most.
- **HHX (Higher Commercial Examination):** Focus on business, economics, and languages—ideal if you're interested in international trade, marketing, or management.
- **HTX (Higher Technical Examination):** Focus on science, technology, engineering, and IT—great for future engineers, tech developers, etc.
- **HF (Higher Preparatory Examination):** Shorter (2 years), more practical, often chosen by people who want to continue to professions like teaching, nursing, or social work.

Recommended if: You enjoy academic subjects and want to keep university as an option.

2. Erhvervsuddannelser (Vocational Education and Training – EUD)

Combines school with hands-on apprenticeships in real jobs (like carpenter, electrician, hairdresser, mechanic, chef, etc.).

- Takes 2–4 years depending on the field.
- You earn money during your apprenticeship (praktik).

Recommended if: You like practical work, want to enter the job market sooner, and aren't focused on going to university right away.

3. Kombineret forløb (EUX)

A mix of **vocational training and general education**, so you get a skilled trade AND qualify for university.

Recommended if: You want both practical experience **and** the option to study at university later.

✨ Things to think about:

Ask yourself:

- Do I enjoy hands-on or classroom learning more?
 - Do I want to go to university in the future?
 - Are there subjects or career paths that interest me already (tech, business, health, art, etc.)?
 - Would I prefer to start earning money earlier?
-

💛 Bonus: Cultural Background

Your Nicaraguan background can be a strength! For example:

- **Languages:** If you speak Spanish, that can be useful in business, diplomacy, or tourism.
 - **Global perspective:** Your bilingual, multicultural background can be valuable in international studies or workplaces.
-

✅ My recommendation (based on what you've shared):

If you're not sure yet but want to keep doors open and you like academic subjects:

→ **Consider STX or EUX.**

If you're more interested in working with your hands and getting into a job quickly:

→ **EUD or EUX** might be a better fit.

Would you like help picking based on your interests (e.g., science, business, creativity, tech)? If you tell me what you enjoy or are good at, I can tailor the advice more.
