

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Niger. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that! Since you've just finished primary school in Denmark at age 16, you're at an important point where you can choose between several solid educational paths depending on your interests, strengths, and long-term goals. I'll break down your options and give some suggestions based on different directions you might want to go.

🎓 Main Educational Paths After Primary School in Denmark

1. Gymnasiale Uddannelser (General Upper Secondary Education)

These programs last about 3 years and prepare you for university.

- **STX (Almen studentereksamen):** Broadest education with focus on humanities, science, and social studies.
- **HHX (Højere handelseksamen):** Focus on business, economics, and international studies.
- **HTX (Højere teknisk eksamen):** Focus on science, tech, and innovation.
- **HF (Højere forberedelseksamen):** 2-year program, more practical and shorter – great if you want to go to university but not spend 3 years.

👉 **Recommended if** you're interested in university or unsure and want to keep your options open.

2. Erhvervsuddannelser (Vocational Education and Training – EUD)

These programs prepare you directly for a job and combine school with apprenticeship.

- You can train to become things like a carpenter, electrician, chef, hairdresser, or health care worker.
- Takes 2–4 years depending on the field.
- You get paid during the apprenticeship period!

👉 **Recommended if** you like practical, hands-on work and want to start earning sooner.

3. Kombineret Forløb / EUX (Vocational + General Upper Secondary)

- EUX mixes vocational training with subjects from gymnasiet.
- You get both a vocational qualification *and* a studentereksamen.

- More demanding, but opens many doors.

👉 **Recommended if** you want a job-ready skill *and* the option to go to university later.

🕒 Choosing the Right Path for You

Ask yourself:

- **Do I like practical work or studying theories and ideas?**
- **Do I want to go to university, or start working earlier?**
- **What subjects do I enjoy the most? Science? Business? Languages? Helping others?**

🔍 Example Scenarios Based on Interests

Interest / Goal	Suggested Path
You like science and tech	HTX or STX with science focus
You like business and might want your own company	HHX or EUX Business
You want to help people (nursing, childcare, social work)	EUD (social & health) or HF
You want to become a skilled worker (electrician, chef, mechanic)	EUD
You're unsure and want to keep doors open	STX or EUX

🌍 Bonus Thought

With your background (Danish + Nigerien roots), you could become a valuable bridge between cultures – maybe in international business, social work, or development work. Learning French (if you don't already speak it) could also be a big advantage for jobs connected to West Africa.

Would you like me to help you make a list of specific schools or programs near where you live in Denmark? Or do you want help exploring careers based on your interests and strengths?
