

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Panama. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing a bit about yourself—that's helpful. Since you're 16 and have just finished **primary/lower secondary school (folkeskole)** in Denmark, you're at an important decision point. In Denmark, you now have a few typical paths to choose from for upper secondary education (**ungdomsuddannelser**). The best path depends on your **interests, strengths**, and what you might want to do in the future.

Here's a clear overview of your main options:

🎓 1. Gymnasiale uddannelser (Academic Upper Secondary Education)

These are 3-year programs that prepare you for **university or other higher education**.

- **STX (Almen studentereksamen):** Broadest program, good if you're interested in subjects like languages, social sciences, natural sciences, etc.
- **HHX (Højere handelseksamen):** Focuses on business, economics, and international trade. Great if you're interested in business or global topics (maybe even Panama connections!).
- **HTX (Højere teknisk eksamen):** Focuses on technology and natural sciences. Ideal if you like engineering, IT, or science.
- **HF (Højere forberedelseksamen):** 2-year option, more practical and flexible. A good path if you're unsure or want a shorter academic route.

Choose this path if: you enjoy school subjects, might want to go to university, and like studying.

🔧 2. Erhvervsuddannelser (Vocational Education and Training - EUD)

These are for you if you're more hands-on and want to get into the **job market quicker**, or learn a specific trade.

Examples include:

- Carpenter
- Electrician
- Hairdresser
- Social and health care worker
- Chef

These programs usually combine **school and apprenticeship (praktik)**.

Choose this path if: you want to start working sooner, enjoy practical work, or are interested in a skilled trade.

Things to Consider:

- Are you more **theoretical or practical** in your learning style?
 - Do you already have a **dream job** or interest area (like tech, medicine, business, art)?
 - Would you consider combining your Danish and Panamanian background, like working in **international business, languages, or global studies**?
-

My Suggestion (Based on What You've Shared):

Since you're fluent in Danish, born and raised in Denmark, and potentially have **cultural/linguistic strengths** from your Panamanian background, you could consider:

→ **STX or HHX** if you like learning, want to keep your options open, and maybe explore international or cultural topics later on.

→ **EUD** if you're not into schoolwork or want to learn by doing. There are also combo programs like **EUX**, which give you both a vocational education and a study qualification.

Would you like help choosing between STX, HHX, HTX, or EUD based on your interests or hobbies? If you tell me what subjects you enjoy or what kind of work sounds fun, I can give a more personal recommendation.
