

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Philippines. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background — it's great that you're thinking carefully about your next steps. In Denmark, after primary school (folkeskolen), you have a few main educational paths to choose from, and the best one for you depends on your interests, goals, and learning style. Since you're 16, you're at the perfect age to choose one of the following:

♦ 1. Gymnasiale Uddannelser (Upper Secondary Education)

These are academic programs that prepare you for university. Choose this path if you're interested in theoretical subjects and possibly want a university degree in the future.

Main options:

- **STX (Studentereksamen)** – general upper secondary education; broad and academic.
- **HHX (Højere Handelseksamen)** – business-oriented; good if you're into economics, marketing, or management.
- **HTX (Højere Teknisk Eksamen)** – focused on science and technology.
- **HF (Højere Forberedelseseksamen)** – a 2-year program, often for students who prefer a shorter, less demanding route to university.

👉 *Best if:* You enjoy school subjects like math, science, history, languages, or business and might want to go to university later.

♦ 2. Erhvervsuddannelse (Vocational Education and Training – EUD)

A more hands-on, practical education. You split your time between school and working as an apprentice in a company.

Fields include:

- Healthcare (e.g., SOSU assistant)
- Technology and IT
- Business and retail
- Craftsmanship (e.g., carpenter, electrician, mechanic)

👉 *Best if:* You like learning by doing, want to enter the workforce sooner, or want to learn a trade with good job prospects.

♦ 3. Kombineret Uddannelse (EUX)

This combines vocational education **and** a gymnasium-level education. You get both practical skills and a qualification that can take you to university.

👉 *Best if:* You want a trade but also want to keep the door open to university later.

♦ How to Choose?

Here are a few questions to reflect on:

- Do you enjoy studying and want to go to university someday? → **Gymnasium (STX, HHX, etc.)**
 - Do you prefer learning by doing and want to work sooner? → **Vocational (EUD)**
 - Do you want both options open (work + university)? → **EUX**
 - Are you unsure and want flexibility? → **HF or STX**
-

♦ Extra Tip for Danish-Filipino Background

Being bilingual and multicultural is a huge strength. You might consider:

- **International Business** (HHX) if you're interested in trade between Denmark and Southeast Asia.
 - **Healthcare** if you're drawn to helping others — there's high demand and job security.
 - **Technology or IT** – these sectors are growing fast, and Danish companies often work globally.
-

Would you like help exploring schools near you or matching this to specific interests or goals you have?
