

Uddannelsesvalg i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Qatar. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing a bit about yourself — that's a great starting point. Since you're 16 and just finished primary school in Denmark, you're at an important decision point. In Denmark, the typical next steps after **9th or 10th grade** are either **gymnasium** (upper secondary school) or a **vocational education and training (VET)** program, depending on your interests and goals.

Here's a breakdown of your main options, tailored to your situation:

♦ 1. Gymnasial uddannelse (Upper Secondary School)

This is the most common path if you're interested in going to university later.

There are a few different types:

- **STX (Studentereksamen)** – General academic focus (sciences, humanities, social studies)
- **HHX (Higher Commercial Examination)** – Focus on business, economics, and languages
- **HTX (Higher Technical Examination)** – Focus on technology and natural sciences
- **HF (Higher Preparatory Examination)** – 2-year program, often for people who didn't take 10th grade or want a shorter path to higher education

Recommended if you:

- Want to keep your options open for university
- Like academic subjects like math, science, languages, or social studies
- Think you might be interested in careers like engineering, medicine, business, law, etc.

♦ 2. Erhvervsuddannelse (VET – Vocational Education and Training)

A mix of school and apprenticeship in a company. You train directly for a trade or profession (like electrician, carpenter, chef, IT supporter, etc.).

Recommended if you:

- Prefer practical learning
- Want to start working sooner
- Are interested in a specific trade or hands-on profession

You can still go to higher education later through **EUX** (a combination of vocational training and upper secondary education).

◆ Things to consider:

- **What are your interests?** Academic? Practical? Creative? Social?
 - **Do you want to study at university later?** → Then gymnasium is usually the best step.
 - **Do you want to start working earlier or earn while learning?** → Then vocational training might suit you better.
 - **Are you good at Danish and other subjects?** Strong grades help with gymnasium entry.
-

◆ Advice based on your background:

- Since you're fluent in Danish and have grown up in Denmark, you have full access to the same educational paths as everyone else.
 - With your cultural background (Qatari roots and Danish upbringing), you may also have strengths in **languages, global understanding, or cultural bridging** – this could make international business, diplomacy, or education interesting fields.
 - If you're not sure yet, consider taking **10th grade (10. klasse)** to explore more before making a decision. Some schools offer focused 10th grade programs (e.g., with a tech, business, or creative focus).
-

◆ Final Thought:

If you're motivated and enjoy school, I recommend going to **STX or HHX**, especially if you want the flexibility to study at university later. If you prefer more hands-on work, **VET with EUX** is a very smart and respected path in Denmark too.

Would you like help finding schools or programs near where you live in Denmark?
