

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Republic of Korea. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background — that helps a lot in giving tailored advice. Since you're 16, just finished primary school, and are fluent in Danish, your next step will typically involve choosing between different youth education paths in Denmark. Here's a breakdown of your main options and how to think about them:

🎓 Main Educational Paths After Primary School in Denmark

These fall into two broad categories: **General Upper Secondary Education** and **Vocational Education and Training (VET)**.

1. General Upper Secondary Education (Gymnasiale Uddannelser)

These prepare you for higher education (university, etc.).

♦ STX (Almen Studentereksamen)

- Focus: Broad academic subjects (languages, sciences, social sciences).
- Good for: Students who are still exploring, enjoy studying, and might want to go to university.
- Duration: 3 years.
- Language: Danish (some international schools offer it in English).

♦ HHX (Højere Handelseksamen)

- Focus: Business, economics, marketing.
- Good for: Students interested in business, international trade, or economics.
- Duration: 3 years.

♦ HTX (Højere Teknisk Eksamen)

- Focus: Technology, science, and engineering.
- Good for: Students who like math, IT, natural sciences.
- Duration: 3 years.

♦ IB (International Baccalaureate)

- Focus: International education in English.
- Good for: Students who may want to study or work abroad, or have a more international focus (e.g., Korea-related career later).
- Offered in: Some Danish schools (e.g., Copenhagen, Aarhus).
- Duration: 2 years + 1 pre-IB year (often needed if coming directly from Danish primary school).

2. Vocational Education and Training (Erhvervsuddannelser, EUD)

These are for learning a trade or profession directly.

- Examples: Electrician, chef, carpenter, IT technician, hairdresser, etc.
- Structure: Combination of school + apprenticeship.
- Good for: Students who prefer hands-on learning and want to start a career sooner.
- Duration: 2-5 years depending on the path.

What Might Suit You?

Here are some things to reflect on:

Question	Path
Do you enjoy academic subjects and might want to go to university later?	STX, IB, or HTX
Interested in business, trade, or economics?	HHX
Like science, tech, or engineering?	HTX
Want to work with your hands and earn earlier?	EUD
Considering international studies or maybe living/working in Korea later?	IB or STX with strong language options

Bonus: Your Korean Background

Your Korean heritage is a strength. If you're interested in using that in your career, consider:

- **International Business or Diplomacy** (HHX or IB → University).
- **Languages and Culture** (STX → University in Korean Studies or Asian Studies).
- **STEM with International Focus** (HTX → study abroad later).

You could also consider **exchange programs** with Korea during your gymnasium or university years.

What To Do Now?

1. **Visit open house events** at local gymnasiums and VET schools.
2. **Talk to a school counselor** (UU-vejleder) – they can help you make the right choice.
3. **Think about your interests** – not just your grades, but what you enjoy doing.

Would you like a quick quiz to help figure out which path might match your interests?
