

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Russian Federation. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that — you're in a great position right now to make choices that can really shape your future. Since you've just finished primary school in Denmark (Folkeskole), your next step is to choose between different types of secondary education. What's best for you depends on your interests, strengths, and long-term goals.

Here's a breakdown of your main options in Denmark, and some guidance based on your background:

🎓 1. Gymnasiale uddannelser (Upper Secondary General Education)

These are for students who plan to go to university later.

The main types:

- **STX (Almen studentereksamen)** – Broad general education (humanities, science, social science).
- **HHX (Højere handelseksamen)** – Focuses on business, economics, and international trade.
- **HTX (Højere teknisk eksamen)** – Focuses on science, technology, and engineering.
- **HF (Højere forberedelseksamen)** – A 2-year general education for more mature students or those who want a shorter path to further education.

Recommended if:

- You're interested in university.
- You like academic subjects (math, languages, science, or social studies).
- You're not yet sure what career you want — it keeps your options open.

🔧 2. Erhvervsuddannelser (VET – Vocational Education and Training)

Hands-on education combining school and apprenticeship. Leads to a skilled job or further education. Examples: electrician, carpenter, chef, IT supporter, health care worker.

Recommended if:

- You like practical, real-world learning.
- You want to work soon or start earning earlier.
- You're interested in technical skills or trades.

3. EUX (Combination of VET and Gymnasium)

This combines vocational training with academic subjects, allowing you to both work as a skilled worker and go to university later.

Recommended if:

- You want the flexibility of both options.
- You're motivated and ready for a challenging path.

Considering Your Russian Heritage

Being bilingual (Danish and Russian) and culturally connected to two countries can be a *huge* asset. If you're interested in:

- **International business** → HHX might be great.
- **Translation or diplomacy** → STX with language and social studies focus.
- **Engineering or IT** → HTX or EUX.

How to Decide

Ask yourself:

- Do I enjoy academic learning or hands-on work?
- Do I want to go to university?
- What subjects do I like best?
- Do I want to start working earlier or keep studying longer?

What You Can Do Next

1. **Talk to a guidance counselor (UU-vejleder)** – They'll help tailor advice based on your grades and interests.
2. **Visit schools' open house events (Åbent hus)** – See what it's like and talk to current students.
3. **Try an introductory course (brobygning)** – Many schools let you try out programs before you decide.

Would you like help deciding between STX, HHX, HTX, or a VET path based on your favorite subjects or career dreams? Let me know, and I'll guide you further.
