

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Sao Tome and Principe. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing a bit about yourself! Since you're 16 and have just finished primary school in Denmark, you're at an important decision point. In Denmark, after **Folkeskole** (primary and lower secondary school), you typically move on to one of several **youth education programmes** depending on your interests, academic strengths, and career goals. Here's a breakdown of the main options, with some advice tailored to you:

1. Gymnasiale Uddannelser (General Upper Secondary Education)

These are more academic and prepare you for university.

a. STX (Studentereksamen)

- Broad academic programme with humanities, sciences, and social sciences.
- Good if you're still exploring your interests or want to keep university options open.

b. HHX (Higher Commercial Examination)

- Focus on business, economics, and marketing.
- Great if you're interested in international business or entrepreneurship.

c. HTX (Higher Technical Examination)

- Emphasis on science, technology, and innovation.
- Good if you're into engineering, IT, or natural sciences.

d. HF (Higher Preparatory Examination)

- Shorter (2 years) and more flexible.
- Suitable if you prefer a less academic, more practical approach, or want to get to university faster.

Recommended if:

You enjoy school and academic subjects, and are possibly thinking about university in the future.

2. Erhvervsuddannelser (Vocational Education and Training - EUD)

Combines school and apprenticeship. You learn a trade while getting paid as an apprentice.

- Includes areas like: carpentry, mechanics, health care, IT support, hospitality, etc.
- Often leads directly to employment.
- You can also take **EUX**, which combines vocational training with academic courses (so you can go to university later if you want).

Recommended if:

You like learning by doing, want to start working earlier, or want a practical job with good pay and job security.

Considerations for You:

- You're fluent in Danish – that's a big advantage.
 - With your background (Sao Tomean heritage), you may also have cultural or language assets (like Portuguese), which could open international opportunities in business, diplomacy, or development.
 - If you're unsure, **STX or HHX** are flexible and respected routes.
 - If you're more hands-on, **EUX** is an excellent hybrid option — you can both work and keep doors open for further studies.
-

Next Steps

1. **Talk to a Studievejleder (Guidance Counselor)** at your current or future school.
2. **Visit open house events** at gymnasiums and vocational schools.
3. **Think about your interests:** Are you more curious about science? Business? Helping others? Working with your hands?

Would you like help narrowing down based on what subjects or careers interest you?
