

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Serbia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing a bit about yourself! Since you've just finished primary school in Denmark (which usually ends after 9th or 10th grade), you're now at an important decision point in the Danish education system. Here's a clear breakdown of your options and how to think about them:

Your Main Options After Primary School in Denmark:

1. Gymnasium (STX, HHX, HTX, or HF) – General or Specialized Upper Secondary Education

- **STX (Almen studentereksamen):** Broad academic focus. Good if you're interested in university later, especially for humanities, social sciences, or natural sciences.
- **HHX (Higher Commercial Exam):** Business- and economics-focused. Ideal if you like finance, marketing, or entrepreneurship.
- **HTX (Higher Technical Exam):** Focuses on technology, science, and math. Great if you're into engineering, IT, or innovation.
- **HF (Higher Preparatory Exam):** Shorter (2-year) academic track, often for those who want more flexibility or didn't thrive in traditional school.

2. Erhvervsuddannelse (EUD) – Vocational Education and Training

- Combines school and hands-on work (apprenticeships).
- Great if you want to become a craftsman, chef, mechanic, hairdresser, electrician, etc.
- Leads to skilled employment quickly but can also give you access to further education later.

3. EUX – The Hybrid Path

- Combines **vocational training** with a **general upper secondary education**.
- Gives you both a skilled trade and eligibility for university.
- A good middle ground if you want options open.

How to Choose? Ask Yourself:

- **What subjects do I enjoy most?** Science, languages, business, tech, arts?
- **Do I prefer hands-on learning or classroom/theory?**
- **Do I want to go to university later?** Or work earlier?
- **Do I want a job with security and a clear path? Or more open-ended?**
- **What are my dreams?** Even if they change later, they can guide your early choices.

Recommendations Based on Your Situation:

Since you're fluent in Danish, born in Denmark, and have both Danish and Serbian cultural background, here are tailored suggestions:

- If you're academically strong and think university could be in your future → **STX** or **HTX** (if you like science/tech).
- If you're business-minded or think of starting something one day → **HHX**.
- If you're more practical and want to get into a profession soon → **EUD** or **EUX** in something like IT, electrical work, or culinary arts.
- If you're unsure and want a broad foundation → **STX** is a safe bet that keeps most doors open.

Bonus: Your Serbian Background

Being bilingual and having a multicultural background is a **big strength**. Careers in **language, diplomacy, business, international relations, or translation** could be future possibilities — especially if you build on both cultures.

Next Steps:

- Visit **uddannelsesguiden.dk** (the official education guide in Denmark).
- Talk to a **UU-vejleder** (Youth Guidance Counselor) – every school offers this for students like you.
- Consider doing a **brobygning (intro course)** at several schools to try out different paths before choosing.

Would you like help comparing two specific paths (like STX vs HTX)? Or help matching your interests with a career idea?
