

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Sierra Leone. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's great that you've finished primary school—congrats! At 16, in Denmark, you're at an important point where you choose your next educational step, usually one of the following paths:

1. General Upper Secondary Education (STX)

- **Who it's for:** If you're interested in a broad academic education and maybe want to go to university later.
- **What you study:** Subjects like Danish, English, math, science, social studies, and you get to specialize (e.g., science, language, or social science).
- **Good for:** Becoming a doctor, lawyer, engineer, psychologist, etc.

2. Higher Commercial Examination Programme (HHX)

- **Who it's for:** If you're into business, marketing, economics, or want to work in international trade.
- **What you study:** Business economics, international trade, languages, marketing, etc.
- **Good for:** Careers in business, management, or starting your own company.

3. Higher Technical Examination Programme (HTX)

- **Who it's for:** If you're into science, technology, engineering, or IT.
- **What you study:** More technical subjects like physics, technology, chemistry, IT.
- **Good for:** Future engineers, programmers, lab techs, etc.

4. Vocational Education and Training (EUD)

- **Who it's for:** If you want to learn a profession and start working sooner.
- **What you do:** Combines school and apprenticeship in a company.
- **Examples:** Electrician, carpenter, hairdresser, chef, social and healthcare worker.
- **Good for:** People who like practical work and earning while learning.

How to Decide?

Ask yourself:

- Do I like practical work or academic subjects?

- Do I see myself at university one day, or working and earning money sooner?
 - Do I like working with people, machines, or ideas?
 - Am I interested in business, tech, science, arts, or helping others?
-

My Suggestion (based on your background)

Since you're fluent in Danish and have a multicultural background:

- **If you're good academically and open to longer education:** Consider **STX** or **HHX**. With international roots, HHX could be a great fit because of its focus on languages and international economics.
 - **If you're more hands-on or want to start working earlier:** Consider **EUD** or **EUX** (which mixes vocational and academic tracks so you can keep the option of university open too).
-

Bonus tip:

EUX might be perfect if you're not 100% sure yet. It gives you both a vocational education **and** a study-qualifying diploma.

If you tell me more about what subjects or careers you're interested in, I can help narrow it down even more.
