

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Singapore. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in Danish. What educational path would you recommend for me?

Thanks for sharing a bit about yourself — that's a great starting point. At 16 in Denmark, you're typically at the stage of moving on from **Folkeskole** (primary and lower secondary school) to **youth education**. Since you're fluent in Danish and have roots in both Denmark and Singapore, you have some unique opportunities. Let's break down your options and what might fit you best depending on your interests and goals.

🎓 Your Main Educational Options in Denmark at 16

1. Gymnasiale uddannelser (Upper Secondary General Education)

These are aimed at students who want to pursue **university studies** later.

- **STX (Almen studentereksamen)** – Broad and academic, with focus on sciences, humanities, and social studies.
- **HHX (Højere handelseksamen)** – Focus on business, economics, and international trade.
- **HTX (Højere teknisk eksamen)** – Focus on technology and natural sciences.
- **HF (Højere forberedelseseksamen)** – A shorter, 2-year option, often for students who want a different pace or path to higher education.

🔴 **Best if:** You want to go to university, enjoy academic subjects, and might want international study options in the future.

2. Erhvervsuddannelser (Vocational Education and Training, EUD)

Combines school and apprenticeships. Leads to becoming a skilled worker (e.g., carpenter, chef, mechanic, healthcare worker, IT specialist).

🔴 **Best if:** You prefer hands-on learning and want to enter the workforce with a trade or practical skills in a few years.

3. Kombinerede forløb (EUX)

A mix of vocational and academic education. You get a skilled trade **and** the qualifications to go to university.

🔴 **Best if:** You want flexibility – to both work with a skill and have the option to study more later.

🌐 Your Singaporean Roots – A Hidden Advantage?

Being connected to Singapore could open up international opportunities — culturally and linguistically. Some ideas:

- Consider taking **English at high level** (A-niveau) during Gymnasiet if you want international opportunities.
- You could explore **IB (International Baccalaureate)** in Denmark if you're academically strong and might want to study abroad in future.
- If your family visits Singapore often, it might be motivating to consider global careers or education paths.

Questions to Ask Yourself

Here are some questions to help you decide:

- Do I enjoy school subjects like math, history, science, or languages? → **STX/HTX/HHX**
- Am I interested in starting to work earlier, maybe with a hands-on job? → **EUD or EUX**
- Do I want to study abroad or at university later on? → **STX, IB, or EUX**
- Do I enjoy business, marketing, or international economics? → **HHX**
- Do I love tech, design, or natural sciences? → **HTX**

My Recommendation Based on Your Profile

Since:

- You're fluent in Danish,
- You just finished primary school (so you'll be starting upper secondary now),
- You have cultural links to both Denmark and Singapore,

I'd recommend considering:

- **STX** if you're unsure and want broad university options.
- **HHX** if you're curious about international business and economics.
- **EUX** if you're hands-on and want a job skill **plus** the option for university.

And if you're very motivated and like English-language education, look into **IB programs** (available in some Danish schools).

If you'd like, I can help you find specific schools or programs near where you live. Just let me know your city or region!
