

Uddannelsesvalg efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Slovenia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

That's great that you've completed primary school and are thinking seriously about your next steps! Since you're in Denmark, you have several educational options depending on your interests, goals, and learning style. Here's a breakdown to help you think it through:

🎓 Main Educational Paths After Primary School in Denmark

1. Gymnasium (STX, HHX, HTX) – 3 Years

These are academic upper secondary programs that prepare you for university.

- **STX (Almen Gymnasium):** Focuses on general subjects (humanities, sciences, social sciences). Ideal if you're unsure yet what you want to study later.
- **HHX (Handelsskole):** Focus on business, economics, marketing. Great if you're interested in entrepreneurship, economics, or international trade.
- **HTX (Teknisk Gymnasium):** Focus on technology, natural sciences, and innovation. Perfect if you're into engineering, science, or IT.

Recommended if: You're academically inclined and may want to attend university later.

2. EUX – Combined Vocational and Academic Education – 4 Years

EUX lets you get both a **vocational education (praktisk fag)** and a **gymnasium-level certificate**, so you can both **work after** or **continue to university**.

- For example, you can become a carpenter, electrician, or IT support technician, and also have the qualifications to go to university later.

Recommended if: You're practical and want to keep your options open (both job and study).

3. Erhvervsuddannelse (EUD) – Vocational Training – 2-4 Years

You train for a specific job and often alternate between **school** and **apprenticeship**.

- Examples: mechanic, chef, healthcare worker, hairdresser, etc.
- You earn while you learn (apprenticeship pay), and often have a job lined up after.

Recommended if: You want a hands-on career and start working earlier.

4. 10th Grade (Tiende Klasse)

Optional. Some students choose to take an extra year after 9th grade to mature, improve grades, or explore interests before committing.

Recommended if: You're unsure what to choose or want a little more time to prepare.

Extra Opportunity – Considering Your Slovenian Background

You're fluent in Danish and likely speak or understand Slovenian. This is a **big advantage**:

- Consider studying **languages, international business, or European studies** later.
 - You might also look into **exchange programs** with Slovenia or the EU – great for language and career prospects.
-

? Questions to Ask Yourself

- Do I enjoy school and academic learning?
 - Do I prefer practical, hands-on tasks?
 - Do I want to go to university?
 - What subjects or activities make me lose track of time?
-

Recommendation Based on Common Strengths at Your Age

If you're not sure yet but did **okay or well in school** and are **interested in keeping your options open**, **STX** or **EUX** are strong choices.

If you already know you **love working with your hands** or have a trade in mind, **EUD** is a great way to go straight into a career.

If you want, I can help you choose between some concrete schools or programs near you. Just tell me your city or region.
