

Uddannelsesvalg efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Somalia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that! It's great that you're thinking ahead about your future. Since you just finished primary school in Denmark, your next step is typically choosing between different types of secondary education — and the right choice depends on your interests, strengths, and goals.

Here's a simple breakdown of your options and some guidance to help you choose the best path:

Main Educational Paths After Primary School in Denmark

1. Gymnasiale uddannelser (Upper Secondary Education – General)

These are academic programs that prepare you for university:

- **STX (Almen studentereksamen):** Broad and academic, with a focus on humanities, sciences, and social studies.
- **HHX (Højere handelseksamen):** Focus on business, economics, and international studies.
- **HTX (Højere teknisk eksamen):** Focus on science, technology, and engineering.
- **HF (Højere forberedelseksamen):** Shorter, 2-year academic track, often used if you prefer a more practical or mature learning environment.

✓ Best if:

You want to go to university or you're still exploring your interests.

2. Erhvervsuddannelser (Vocational Education and Training – VET)

These are practical and hands-on, often combining school with internships (praktikplads):

- Examples: Electrician, healthcare assistant, carpenter, IT-supporter, chef, etc.
- You can also take **EUX**, which combines VET with academic classes – so you can both get a trade and qualify for higher education.

✓ Best if:

You want to work sooner, prefer learning by doing, or are interested in a specific trade or skill.

Some Questions to Reflect On:

- Do you enjoy school subjects like science, languages, or humanities?

- Are you more hands-on, technical, or interested in business?
- Do you want to go to university in the future?
- Are you more comfortable in a practical or academic environment?

Suggestions Based on Your Situation:

Since you're fluent in Danish, born and raised in Denmark, and have roots in Somalia, you have a strong cultural and linguistic foundation that can open many doors.

Here are **three good directions** you could explore:

- ♦ **1. STX or HHX if you're unsure and want flexibility**
 - Good if you're still figuring things out.
 - Prepares you well for university, including fields like medicine, law, teaching, business, or international relations.
- ♦ **2. HTX or EUX if you're more technical or want a balance**
 - HTX if you enjoy science/tech and want to go to university.
 - EUX if you want a job skill but also keep university as an option.
- ♦ **3. VET program if you want a career sooner**
 - Especially good if you have a specific interest (e.g., IT, healthcare, construction).
 - Denmark needs skilled workers, and this path is respected and well-paid.

Final Advice:

Talk to a school counselor (**uddannelsesvejleder**) — they can give you guidance tailored to your interests. Also, visit open house events (**introdage**) to get a feel for different schools and programs.

If you tell me a bit more about what subjects or careers interest you, I can give even more specific advice!
