

Uddannelsesvalg efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from South Sudan. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing a bit about yourself! At 16, you're at a key point where the choices you make can shape your future, but it's also a time when it's totally okay not to have everything figured out yet. Since you've just finished primary school (which likely means **9th or 10th grade** in Denmark), here are the main education paths you can consider next—and how to choose the one that fits you best.

Main Educational Paths After Primary School in Denmark

1. STX – General Upper Secondary School (Gymnasium)

- **Focus:** Academic, broad subjects (humanities, science, social sciences)
- **Good for:** Students who want to go to university later
- **Duration:** 3 years
- **Recommendation:** If you're interested in subjects like languages, history, science, or want a flexible foundation for university.

2. HTX – Technical Upper Secondary School

- **Focus:** Science, technology, IT, innovation
- **Good for:** Those interested in engineering, tech, or applied science
- **Duration:** 3 years
- **Recommendation:** Great if you're curious about how things work or like problem-solving.

3. HHX – Business Upper Secondary School

- **Focus:** Business, economics, marketing, international trade
- **Good for:** Students interested in entrepreneurship, finance, or business studies
- **Duration:** 3 years
- **Recommendation:** Choose this if you're thinking about running your own business or working in commerce.

4. EUX – Vocational + Academic Education

- **Focus:** Combines vocational training with general subjects (like Danish, math, English)
- **Good for:** Getting hands-on skills **and** still being able to apply to higher education
- **Duration:** Around 4 years
- **Recommendation:** Great for practical learners who also want university as an option later.

5. EUD – Vocational Education (Apprenticeships)

- **Focus:** Direct training for a job (e.g., electrician, hairdresser, chef, mechanic)
- **Good for:** People who want to start working sooner and learn by doing
- **Duration:** 2–4 years depending on the trade
- **Recommendation:** Ideal if you prefer hands-on work and have a specific trade in mind.

How to Choose the Right Path

Ask yourself:

- Do I enjoy academic subjects (reading, writing, theory)? → **STX, HTX, or HHX**
- Do I like working with my hands or learning through action? → **EUD or EUX**
- Do I want to go to university one day? → **STX, HTX, HHX, or EUX**
- Am I unsure? → **STX** gives you the most flexibility

Your Background and Opportunities

Being fluent in Danish and having roots in South Sudan could be a unique strength. You could consider:

- **Global Studies or International Business** (if you're interested in cultures and world affairs)
- **Social work, education, or healthcare** (if you want to give back or support others)
- **STEM or IT** (if you're into innovation and future-oriented fields)
- **Role model programs or mentorship** – Many organizations in Denmark encourage diversity and inclusion. Getting involved in one could open doors for support, scholarships, or internships.

Final Tip

Visit open house events ("**åbent hus**") at local gymnasiums or vocational schools to get a real feel for each option. Talk to guidance counselors (**studievejleder**)—they're there to help and can give advice tailored to you.

If you tell me more about your interests (like favorite subjects, hobbies, or future dreams), I can give a more specific recommendation.
